

Protects the pump from damaging heat build-up while it is in bypass mode. The thermal relief valve, sensing a rise in temperature, opens and discharges a small amount of heated fluid. This allows cooler water to enter the system and cool the pump. When the gun is discharged the cooler water will cause the valve to close immediately.

**FEATURES**

- Most consistent temperature range on the market
- Quickest response to rising temperature
- Less stress on pump
- Shorter overall length
- Most cost effective thermal protector on the market
- Mounts easily in the pump manifold, inlet water supply or bypass loop plumbing

**SPECIFICATIONS**

Part Number	Description
100556	145°F 1/4" NPT
100557	145°F 3/8" NPT
100558	145°F 1/2" NPT
100677	w/o Barb 190°F 3/8" NPT
100678	w/o Barb 190°F 1/2" NPT
100679	with Brass Barb 190°F 3/8" NPT
100680	with Brass Barb 190°F 1/2" NPT
<hr/>	
Hose Barb	90° 1/4"
<hr/>	
Weight:	1.5 oz.
<hr/>	
Dimensions	1-1/2" H x 1" W
<hr/>	
Materials	Brass, Buna, Delrin, Stainless Steel
