John Allison is known throughout the industry as the **Master of PW Equipment Design.**

This is his latest creation.

Based on actual in-field testing by Fairview Mobile Wash the New KOHLER EFI without the **AUTO IDLE DOWN** will yield a...

...fuel savings of \$1.50 per hour.

This means that if you work your equipment 30 hours per week over the course of one year you will save \$2,340.00 in fuel cost. That means that this unit would really cost **\$230.88!**

BONUS - THIS SYSTEM is also equipped with **AUTO IDLE DOWN TECHNOLOGY** which means when you release the trigger the engine returns to idle and saves you even **MORE** fuel.

ADDITIONAL SYSTEM FEATURES:

Tachometer with Hour Meter, Comet Triplex Industrial Pump, "Soft-touch" VB-10 Unloader, 1/4" Industrial Frame with 6 Isolators that bolts to any flat surface, 7500 PSI Ball Valve that allows the operator to change guns without having to shut down the system, Pre-plumbed and drilled for 2-gun operation, Glycerin Filled Pressure Gauge, Premium 'Easy-Dump' Water Filter, Safety Pressure Relief Valve, Allison Engine Terminator that shuts down the engine if the pump overheats.

This system also has a 25 AMP Recharging system which means that anytime you want to make this a 'hot-water' power washer all you will have to do is buy our 12-volt hot water heater #9812 or #9817.
