Allison GENERATION 2

SEVERE DUTY PUMPS FOR INDUSTRIAL POWER WASHERS

Isn't it much easier to make good decisions when things...
...just make sense!

**CHECK VALVES, PACKINGS
 HEAT FAILURE WARRANTY***
**5 YEAR
 WARRANTY**

PISTONS, RODS, CRANKCASE
**5 YEAR
 WARRANTY**

HEAD, CRANK, BEARINGS
**10 YEAR
 WARRANTY**

For example: You can buy a **TS2021 Pump** for **\$575.00** that is rated at 5.6 gpm @ 3500 psi and the pump is all you get.

or for LESS MONEY...

you can buy the new **'Generation 2' Allison Pump** that gives you a **true 6.0 GPM** and is rated up to **4,100 PSI**.

PLUS - look at the standard features of the Generation 2 pump.

1. Allison Engine Terminator that 'shuts down' the gas engine when the pump head overheats.
2. Unloader Valve that is already set to the proper PSI/GPM
3. **SUPER SUDS SUCKER INJECTOR**
4. Clear Bowl Water filter
5. Safety Pressure Relief Valve
6. 6,000 PSI Pressure Gauge
7. Quick Change Oil Plug
8. Tall Rails that are an exact match for the TS2021 mount.

Part No.	PSI/GPM	DESCRIPTION	PRICE
B4SD 5638	3800 PSI 5.6 GPM	Bare Pump with Terminator and Oil Drain	\$485.00
B7SD 6240	4000 PSI 6.2 GPM	Bare Pump with Terminator and Oil Drain	\$535.00
4SD 5638	3800 PSI 5.6 GPM	Complete Pump as shown	\$535.00
7SD 6240	4000 PSI 6.2 GPM	Complete Pump as shown	\$570.00
7SD 6240 GR1	4000 PSI 6.2 GPM	Complete Pump as shown with 1" dual bearing Gear Box	\$769.00
7SD 6240 GR2	4000 PSI 6.2 GPM	Complete Pump as shown with 1-1/8" dual bearing Gear Box	\$769.00

SEVERE DUTY PUMPS - with a 5-year packing/valve warranty!*

***That's right! When you have the Allison Engine Terminator hooked up we will guarantee you that you will NEVER - EVER burn up PUMP PACKINGS AGAIN!**

Prove your value

to future *and* current commercial customers

Fending off competitors shouldn't stop once you have the account

The world's changed since around 2007—have you noticed? When the economy started slipping, so did revenue for companies of all kinds. Firms responded by looking for ways to reduce, or eliminate expenses, especially the ongoing kind. Lately, the nation's overall economic situation finally seems to be improving a bit, and that's good news. The bad news is, we've all become accustomed to keeping a tight grip on our money.

So what's that mean for cleaning contractors, who represent one of those ongoing expenses? It means that things could seem to be going fine with our business customer, until one day we get the word that we've been replaced by a cheaper contractor. Or maybe they've hired the manager's nephew to pressure clean the fleet. Or they can simply no longer justify the cost of regular cleanings of their buildings.

It happens all the time. But it happens most often to contractors who haven't taken the time to explain why keeping a quality vendor around really is in their long-term best interest.

Don't assume that customers know what you know

If companies don't understand the difference between top-notch work and the splash & dash efforts of a low-baller, then why exactly would they spend the extra money? But what if you explained that the caustic chemicals the other guy is using actually remove paint from their trucks along with the dirt? In a few years, their fleet starts looking shabby, damaging their brand's image, but then it's too late. Replacing vehicles is going to cost them a lot more in the long run than simply using a contractor like you who can keep even older trucks looking new.

Maybe at one time you successfully convinced them why you can do a better job, and that's how you got the account in the first place. But it's been a while. Their financial pressures have increased. Maybe the person who hired you isn't even there any more. Remember, it's someone's job there to do a cost/benefit analysis on each line-item expenditure, looking

for places to cut. If they're not reminded that your services are a genuine long-term investment...then you're just another expense on the ledger sheet.

Objective information beats a salesy 'pitch'

Remember, customers don't understand everything you do about quality pressure washing. That lack of knowledge can lead to poor decisions. But when you provide hard information on how much you help preserve their expensive assets, they'll have an objective basis for making the right choices. In their world, making a good business case is the foundation of being taken seriously.

Of course, as in any marketing, we have to understand what's most important to the decision-maker, so we can customize our message to hit the right notes.

Is it just about cost? Then perhaps by using the right products and techniques, you can show them how less-frequent cleanings could suffice. It may cost you a little income, but you'll gain their ongoing loyalty.

Is it about appearance and company image? Maybe do a side-by-side demonstration of how you sweat the details, compared with how a low-cost contractor might knock it out. Remember, seeing is believing.

Are they concerned about environmental and employee-health issues? Prepare a report on the safety of your EnviroSpec detergents and other products, vs. the hazards of straight bleach and fume-producing chemicals. The time you spend on it is an investment in your own business. This approach also shows that you care about the things they care about. And that bond is golden.

Get your message across to the real decider

A written rationale for your quality services also makes sense

when you're dealing with an employee, but can't get through to the CEO or final decision maker. Whether it's a new prospect or an old client, no one can make your case better than you can. At least when something's on paper, your words are more likely to get through to the people who matter most.

Another idea: go further and prepare an analysis of the customer's specific needs, then include several well-thought-out options, with the pros and cons of each. That way, no matter what direction they take, you win.

You can also get creative and shoot a brief video that demonstrates your cleaning superiority. Why not? Sending a prospect a link to your video on YouTube is a great way to stand out as an authority in your field. And that link can easily be shared with anyone.

Be proactive, and never take a customer for granted

Think it through. Are there any other ways in which cutting their cleaning budget might have negative repercussions? Remind them that they're fending off competitors as well, and dirty buildings or vehicles can leave a negative impression on their own current and prospective buyers.

In fact, marketing experts have pointed out that a company's "brand" exists only in the buyer's mind, as the sum total of their experiences with that company. A single bad impression can't be overcome even with a million-dollar advertising budget.

It may be hard to keep a good account these days, but replacing a lost customer can be even harder. So ask questions to understand what's important to each buyer, then present good, objective information that shows you're on their side. That's the difference between a trusted long-term partner and just another vendor.

Problem: Are you taking the paint off trucks along with the dirt?

Solution: Prodigy

Did you know that many truck cleaning products are actually corrosive? Sure, they wash away the surface dirt, but since they work like paint strippers, they also wash away a microscopic layer of paint.

Eventually, the result of using these caustic chemicals is a dull looking finish, where there used to be a bright, shiny surface. The customer wonders why his equipment seems to be aging so quickly.

But contractors who try Prodigy by EnviroSpec see at first glance that its superior degreasing properties are simply better at removing

tough road grime. And the sparkling high-gloss finish that's left makes the entire fleet look new.

Which is probably why the major carriers clean hundreds of thousands of their vehicles with Prodigy, making it the

number 1 selling truck wash in the country. Find out more at EnviroSpec.com/Chem_Prodigy.htm

Looking for a high-foaming alternative? New Black Jack is perfect for hot climates where water evaporates quickly. It also rinses faster when using hot water.

So from now on, take off the dirt—and only the dirt.

40 years ago our company started out as a contractor just like you and because of that experience we are the only company in the industry that 'speaks your language!'

THE MAGIC BEHIND

SUPERFLO POLYMER

that everything that he purchased was thought up and compounded by someone who had never had to clean anything for profit. It was after many very expensive 55 gallon drums of watered down detergents when John finally realized that if he was ever going to make it in such a demanding industry he needed to learn how to make his own chemicals.

John set up a small lab at his business and over the next few years his 'chem lab for a dummy' flourished. Almost every day John would head out to a job site with yet another 'concoction' that he had dreamed up the night before. He would take his new formula out and if it showed any signs of success he would keep 'tweaking' it until it was either a great success or a horrible failure. John says the failures ran about 99 to 1 over the successes.

Over the next few years John learned what to use and what not to use to clean the delicate surfaces of stone and brick, the greasy surfaces of commercial vehicles, the impossible to clean restaurant exhaust hoods, aluminum and vinyl sided houses, pools, patios, roofs, concrete, cement mixers, etc. and he learned all this without 'blowing himself up' in the process. Although there were several close calls along the way.

Now John Allison had developed an incredible arsenal of cleaners by 1984 and yet the SuperFlo Polymer™ product that is now known throughout the industry today was not even on the horizon at that time. Here is how the SuperFlo Polymer™ product came about and how it has dramatically changed the complexion of the professional mobile wash industry.

John had an account that had several terminals scattered throughout New England, New York and New Jersey. When one of his vehicles left to service these accounts it would be 2-3 weeks before it would return so it had to leave with enough chemical to complete the schedule. Oftentimes that meant carrying up to 15 drums of soap. Most of the time the vehicle also carried 500 gallons of water and that coupled with the weight of the soap resulted in some very expensive fines as the truck would pass through the weigh stations along the way from job site to job site.

There had to be a way to be able to put enough powder in solution where 1 drum of detergent (even if it were a 'sludge') would equal 3 drums of a super concentrate that could be further diluted through a downstream injector. In detergent chemistry the 'rule of thumb' has always been that - at best - you can only mix one pound of powder to 1 gallon of water without 'fall-out' or separation occurring. And here John is trying to defy all the laws of chemical compounding by attempting to mix 3 pounds of powder into one gallon of water and having it hold in solution.

John contacted a chemist friend who had suggested that maybe he should look outside of the detergent chemistry industry and try to find something or a combination of 'somethings' that could couple or 'tie-up' the solids and keep them in a solution. His friend also told him that every once in a

while all the 'stars will align' and what is known in the chemical formulary industry as 'black magic' will occur. He did and it did. And one day - out of nowhere - the blends came together and when they did John had a product that could be added to detergents that would couple as much as - not 3 pounds per gallon - but up to 4 pounds per gallon.

EVEN MORE MAGIC

The longer you wash a surface with any of our products that contain SuperFlo Polymer™ the shinier it gets. Even the lustre on surfaces that have been 'burned' and 'dulled' by contractors who have used harsh, low cost caustic cleaners will be rejuvenated and brought back to life.

When EnviroSpec puts on a chemical customer they are a chemical customer for life and it's all because of SuperFlo Polymer™!

So what is this magical product called... SUPERFLO POLYMER and why has it made EnviroSpec chemicals the most asked for detergents in the professional cleaning/mobile wash industry? Years ago John Allison, the owner of EnviroSpec, was a contractor just like you. And - just like you - he tried everyone's 'claim to fame' detergents until he realized

BOND BREAKER

As a vehicle 'cuts' through the air particles lock onto the surface as a result of what some would refer to as 'static cling.' A professional mobile washer knows this occurrence as 'road film' and until now the only way they have been able to remove this 'film' is by brushing the entire trailer.

Bond Breaker effectively removes 97%-100% of all 'road film' without ever having to touch the vehicle. This incredible product has been cutting cleaning time for contractors for over 2-decades.

We have the best Chemical Sales Staff in the industry. Who are they? Our customers! Call today for a list of professionals who make a living using **Bond Breaker**.

Trying to clean trailer bodies that are loaded with 'exhaust carbon' has been a nightmare for every contractor who has ever attempted to make a living washing commercial vehicles.

Every mile traveled by 95% of every tractor/trailer on the highway results in more work and less profit for those who attempt to keep them clean. Since truck washing was the 'back-bone' of my company many years ago I know first hand the difficulties you experience.

The absolute - only way to tackle this 'monster' is with solvents and not only the right family of solvents but plenty of them. Although it's ZP1 Complex Base - Prodigy is loaded with solvents...

Mr. Muscle contains 3-times as much.

TRUCK WASH CHEMS

VIPER

Non-Caustic Degreaser with Gloss Enhancers for Dull Surfaces

VIPER is specifically formulated for the Truck and Bus Washing Industry where exhaust residue has become attached to the stack side of trailer bodies and the rear engine areas of city buses. It's excellent rinsing characteristics make it a favorite among contractors who service large vehicle accounts.

Due to the carbon release agents and solvents in VIPER, it is also frequently utilized in other areas where heavy build-ups of grease and oil is present such as garage floors, maintenance shops and service stations.

BLUE LIGHTNING

High Foaming with Quick Rinse Agents & Gloss Enhancers

BLUE LIGHTNING is a blend of the very best "job specific" ingredients that cover a wide variety of cleaning tasks to ensure the "perfect clean". It rinses quickly and has a large amount of LAUROX LO which wets the surface while generating a foam bed that suspends impurities for thorough rinsing leaving a clean, glossy surface. This product is excellent for overcoming problems associated with hard water.

BLUE LIGHTNING is formulated for commercial truck washing but can be used in virtually every type of cleaning environment. It is great for house washing, brick & masonry cleaning, car washing, wood surfaces & engine de-greasing to name a few!

24% SUDS SUCKER

- Includes Ceramic Chlorine/Acid Ball

Either Size \$10.95
#1511 2-5 GPM, Non-Adj.
#1512 5-8 GPM, Non-Adj.

ALLISON FOAM TURBINE

- The New Allison Foam Turbine develops an 'aerated' wet foam. It has a detachable spray nozzle that once removed will provide you with a 0° nozzle that reaches up to 30'.
- Comes standard with an 'aerating' chemical injector. One barb goes to chemical and the other barb is used to induce additional air into the Turbine when more foam is required.

Injector installs on discharge side of machine

#7500 Foam Turbine and aerating injector \$195.65

- One side to Chemical
- The other side for additional air

Attach Turbine to end of the lance

>ALLISON 'BANSHEE' CHEM-SHOOTER

- The Allison Chem Shooter Long Distance Chemical Injector attaches to the end of the lance.
- Includes 3-each high impact laser nozzles for both distance and high volume chemical.
- Fully adjustable for 'waste-free' chemical application.
- Material: Stainless Steel body with Chlorine Ball.
- Includes 100' of clear chemical line & premium chemical filter.

HIGH IMPACT NOZZLES
Set includes: 0040, 50 & 60

#BCS58 3-10 GPM - Includes Injector & Noz. Set \$92.65
#5555 Nozzle Set only \$25.70

PREMIUM CHEM FILTER

- Stainless Steel & Brass Construction
- More actual filter area than most
- Has removable check ball

#1153 \$3.75
