PROFESSIONAL POLES

Our Fiberglass and Aluminum Extension Handle is sure to meet and exceed your needs for a high quality, multiple application wash handle. The first tier of the handle is crafted with sturdy fiberglass to ensure strength and dexterity, while offering a sleek design with black ridged handles to prevent slipping in any wet environment. The second tier, which makes up the extension of the handle, is built with versatile aluminum to give the overall handle a lower weight to mass ratio; which, in turn, gives you more control and less weight up to 16 feet.

Allison WARHORSE PRESSURE WASHER

THE MOST POWERFUL!

THE MOST ADVANCED!
www.envirospec.com

I sold more jobs as a contractor simply because...

1. I looked like a **PROFESSIONAL** when I showed up in my nice **CLEAN** service vehicle wearing my **CLEAN** uniform with my name over the pocket and...
2. **THEY KNEW** I was a serious **PROFESSIONAL** when they saw my **EQUIPMENT** - especially since the last guy that showed up arrived in a '92 Hyundai Excel with a 'worn-out' pressure washer in the trunk.

Yes, all those guys I 'batted' heads with for 20 years as a contractor are doing something else now.

What will you be doing in 20 years?

Looking the part and having professional equipment will open the doors if it is your choice to remain in this industry.
