NEW NEW NEW NEW NEW 2013

MoJo

Our newest House Wash
is just in time for the 'kick-off' of
HOUSE WASH SEASON

Each year in the 'off-season' we work on bringing something new to the contract cleaning industry that we hope will make their job easier and more profitable.

This year was no different. For the past several months our application engineers have been working diligently to produce a product that will meet many of the concerns that contractors brought to our attention over the last season. Concerns like mold, mildew, exhaust carbons containing lead have always been a major concern of the contractors and homeowners alike.

This year you can put a lot more 'kick in your step' with this new product. **MoJo** produces a high alkali bed that attacks all of these concerns and yet is gentle on the surface.

First introduced in the 70's the

TS-2021

is still a popular pump and here is a...

VERY POPULAR PRICE!

\$422.00

More Contractors visit ENVIROSPEC.COM
than all other industry web sites. To the left is why!
