

**I**t is a fact that approximately 85% of all Mobile Washers that go into business today will be out of business in less than 3 years. The majority will go out simply because they are not equipped to do the job and the customer knows it. When you don't 'look the part' you can't ask professional prices. This is why you see so many people washing houses for \$79.95, where a properly equipped contractor will get \$400.00+ for the same job. Consumers know the value of having the proper tools and they find it hard to justify higher prices when they can rent the same equipment that the contractor shows up with from the local rental store for \$29.95 per day.

Prospective clients know you are a serious and capable contractor when you show up with an Allison Iron Horse. More often than not the job is half sold simply because you look like a professional and you look like you have made the necessary investment in your company that translates into being able to provide the services they need.

IRON HORSE SYSTEM SPECIFICATIONS - OTHER CONFIGURATIONS Avail.
