

- On May 4, 2009 Suzie's Friends Not for Profit Spay/Neuter Hospital Opened. That day we performed 30 Spay/Neuters. Our goal is to perform a minimum of 90 Spay & Neuters per week. Our 4,000 s/f facility is located at 3681 Altama Ave in Brunswick, GA 31520. It is equipped with the very best equipment and staffed by an incredible team of caring professionals.

DID YOU KNOW

Each day 10,000 humans are born in the U.S. - and each day 100,000 puppies and kittens are born. As long as these birth rates exist, there will never be enough homes for all the animals.

As a result, millions of healthy, loving cats, dogs, kittens and puppies face early deaths because of what we have grown to believe is our only form of animal control. Others are left to fend for themselves against automobiles, the elements, animals and cruel humans.

I say to you today that warehousing animals in Humane Societies or animal control facilities has absolutely nothing to do with eliminating the problem.

Just recently I read a brochure sent to me from a local animal agency where they talk about their budget as being \$30,000.00 per month and last year they adopted 400 animals. This means that every adoption last year cost \$900.00 each. When you look at the numbers below you can see where spaying 20 female cats means that 6,000 unwanted animals will never show up at an animal shelter or Humane Society.

Here are the facts. An unspayed female cat, her mate and all of their offspring, producing 2 litters per year, with 2.8 surviving kittens per litter can total:

1 Year:	12
2 Years	67
3 Years	376
4 Years	2,107
5 Years	11,801
6 Years	66,088
7 Years	370,092
8 Years	2,072,514
9 Years	11,606,077

Suzie

And YES we are still talking about starting out with 1 unspayed cat!

Please help stop the suffering.

*It really is...
...the only chance they have!*

- This 'State of the Art' Hospital was built so that families of all income levels could afford care for their pet.
- When you first see the Suzie's Friends facility the impression is unmistakable. This is truly one of the finest Spay/Neuter Hospitals in the country.

- Above is our intake room with 31 surgeries already scheduled for Monday, May 11. In this room the animals are removed from their carrier and anesthetized.
- Below - In our facility we have 15 recovery rooms where animals go after surgery. Each room is heated and ventilated to keep odor down and eliminate the possibility of spreading disease.

- Heated operating tables keep the animals warm during the 15-20 minute female surgery. For males the surgery will only last about 2 minutes. From here they will go to their recovery room.
- Below is the pre-table where tummys are shaved, ears are cleaned, nails are clipped and a pat on the head is given before they go into surgery.

- Above is the entry to the Hospital from the Adoption Center.

- Below is the Adoption Center where the animals enjoy being pampered while lounging around and watching the birds in the feeders just outside the windows.

- Above is our (already famous in these parts) 4-hole'er 'Kitty Krapper.' We were worried about the offensive smell of typical litter boxes. The Kitty Crapper has 4 individual compartments with huge litter boxes and each compartment is ventilated to the outside of the building.

St Francis 'stands watch'
over our animals.

- Above is more adoption center.
- Below is a painting of our dear friend, Dr Amos Barfield, who is no longer with us. Doc was our first Vet when we moved down in 1992 and is partially responsible for us wanting to build this facility. His dream has become ours - no more homeless pets.

- Above is more adoption center
- Thanks Doc - for all you did.
