

SMART SOLUTIONS FROM **ENVIROSPEC.COM**

PowerWashPro

END OF YEAR SUPER SALE!

The Hit at this years 2014 PWNA CONVENTION

The rethinking of **Skepticism** is what was left in the minds of everyone as EnviroSpec departed the PWNA Convention in Orlando last month.

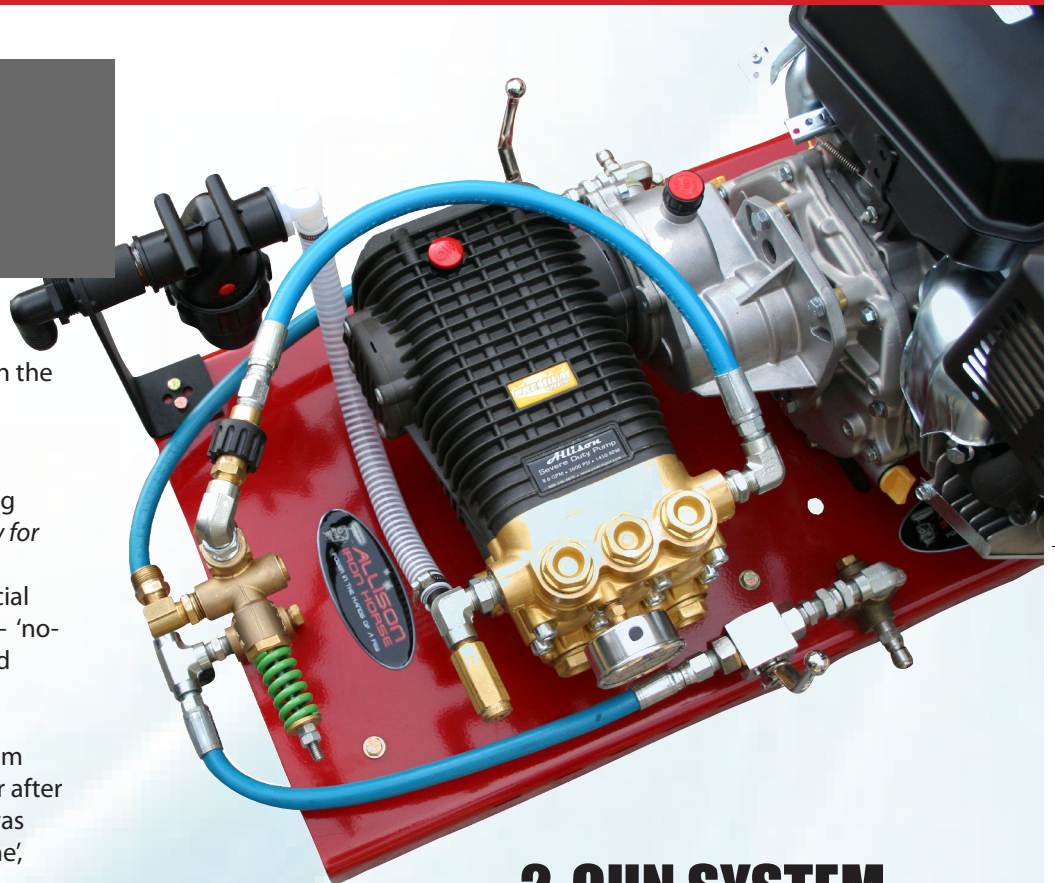

A few weeks prior to the show we started telling customers that we would be unveiling our *New for 2015 - 8.6 GPM, 2,000 PSI, Dual-Gun Power Washer* powered by a 14 HP KOHLER commercial engine. Immediately we heard comments like - 'no-way', 'impossible', 'can't be done', 'your crazy' and many others.

Well, the second we fired off the **8620DG** system all of that skepticism disappeared as contractor after contractor took their turn behind the gun. It was then when the comments changed to 'awesome', 'unbelievable', 'out of sight' and on and on.

EnviroSpec always moves the bar higher and higher each year as we think up new things and bring to you more and more technology that will make your job easier and your company more profitable and the **8620DG Dual Pumper** is just another **great** example.

The *New for 2015* WARHORSE **8620DG** power washer is just one more example why EnviroSpec and Allison Iron Horse have always been known as the leaders when it comes to bringing the latest and greatest equipment and technology to the professional marketplace.

All this and Only 14 Horsepower!

2-GUN SYSTEM

**1 GUN WILL PRODUCE
8.6 GPM @ 2,000 PSI**

**2 GUNS WILL EACH PRODUCE
4.3 GPM @ 2,000 PSI**
