

WORK FEWER HOURS. SPEND LESS ON

Find out what savvy mobile wash pro's already know.

SAVE ON FUEL

Just release the trigger, and the engine returns to idle.

J. Allison Signature Pressure Washers

When any engine is idling, naturally it uses less fuel. So with the optional **Electronic Engine Idle Down** feature on your new Allison pressure washer, how much could you expect to save in gasoline costs over the course of a year? **Up to \$2,500.** That means your powerful new machine will pay for itself in just **18 months!** Well, the savings might be less if gas prices suddenly dropped way down...but don't hold your breath on that one.

Just go to **EnviroSpec.com**, click on *View Catalog*, click on *Pressure Washers*, then keep clicking to find out about all the impressive equipment options and specs. Because now more than ever, wasting fuel is just not cool.

Did you know that 100% of the profits from EnviroSpecs' chemical sales go to worthy causes, such as the care and spay/neutering of abandoned pets?

SAVE ON CHEMICALS

Use less. Clean more.

EnviroSpec Detergents

You'd think that the more soap you use, the cleaner the surface will get, right? Well, think again.

Mix one part of any **EnviroSpec** detergent to two parts water, and field test it against a full-strength batch of any other company's soap...and you just might feel your eyebrows rise up in surprise.

The 'black magic' behind EnviroSpec chemicals is called **SuperFlow Polymer™** and its super-concentrated power means that you can do the same job with a lot less detergent.

How will that affect your bottom line? You do the math.

A little foam goes a long way.

The Allison Foam Turbine

Detergents in a liquid state generally run down a vertical surface quickly and unevenly. So you have to stand there and keep adding soap...and more soap...to eventually end up with anything close to a clean surface.

But **EnviroSpec's Foamer** system shoots out foam instead of liquid, which clings to walls. It slides down slowly, deep-cleaning every square inch along the way. That's the most cost-efficient use of detergent you're likely to find.

Find out more at **EnviroSpec.com**. Click on *View Catalog*, then on *Foamers*. Use the system with EnviroSpecs' wide assortment of foaming chemicals, and you'll find the savings adding up. And that, of course, is a good thing.
