

# WORK FEWER HOURS. SPEND LESS ON SUPPLIES. CHARGE THE SAME FEES.

Find out what savvy mobile wash pro's already know.

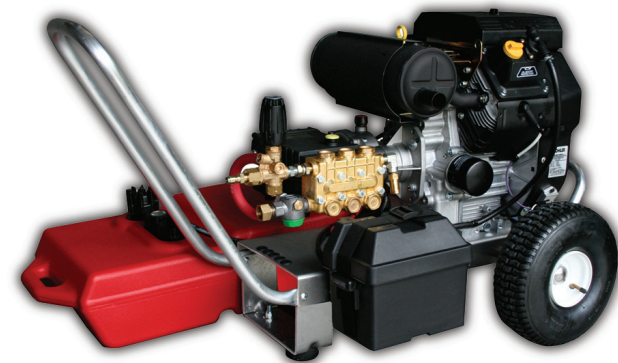

## SAVE ON FUEL

### Just release the trigger, and the engine returns to idle.

#### J. Allison Signature Pressure Washers

When any engine is idling, naturally it uses less fuel. So with the optional **Electronic Engine Idle Down** feature on your new Allison pressure washer, how much could you expect to save in gasoline costs over the course of a year? **Up to \$2,500.** That means your powerful new machine will pay for itself in just **18 months!** Well, the savings might be less if gas prices suddenly dropped way down...but don't hold your breath on that one.

Just go to [EnviroSpec.com](http://EnviroSpec.com), click on *View Catalog*, click on *Pressure Washers*, then keep clicking to find out about all the impressive equipment options and specs. Because now more than ever, wasting fuel is just not cool.

Did you know that 100% of the profits from EnviroSpec's chemical sales go to worthy causes, such as the care and spay/neutering of abandoned pets?

## SAVE ON CHEMICALS

### Use less. Clean more.

#### EnviroSpec Detergents

You'd think that the more soap you use, the cleaner the surface will get, right? Well, think again.

Mix one part of any **EnviroSpec** detergent to two parts water, and field test it against a full-strength batch of any other company's soap...and you just might feel your eyebrows rise up in surprise.

The 'black magic' behind EnviroSpec chemicals is called **SuperFlow Polymer™** and its super-concentrated power means that you can do the same job with a lot less detergent.

How will that affect your bottom line? You do the math.

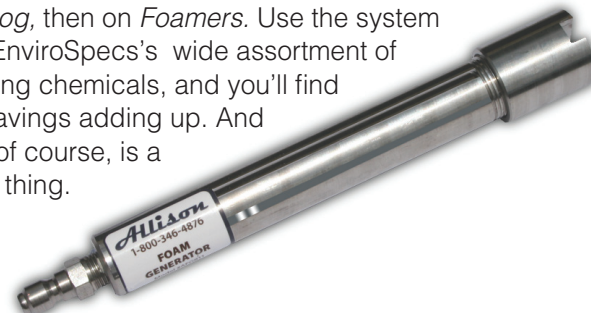

### A little foam goes a long way.

#### The Allison Foam Turbine

Detergents in a liquid state generally run down a vertical surface quickly and unevenly. So you have to stand there and keep adding soap...and more soap...to eventually end up with anything close to a clean surface.

But **EnviroSpec's Foamer** system shoots out foam instead of liquid, which clings to walls. It slides down slowly, deep-cleaning every square inch along the way. That's the most cost-efficient use of detergent you're likely to find.

Find out more at [EnviroSpec.com](http://EnviroSpec.com). Click on *View Catalog*, then on *Foamers*. Use the system with EnviroSpec's wide assortment of foaming chemicals, and you'll find the savings adding up. And that, of course, is a good thing.

## SAVE TIME

### Winning the rinse race.

#### Speed-X-777

When you're washing a building, most of your time on the job is spent rinsing rinsing rinsing, right?

Stop wasting your time. Just add the *quick-rinse* additive **Speed-X-777** to any alkaline detergent. Then when you rinse, you'll see the soap explode off the surface, along with all the dirt. You'll be done before you know it.

Sure, you may feel a little silly for having wasted so many of your work hours rinsing. But instead, we think you should feel smart for discovering Speed-X-777. Learn more at [envirospec.com/Chem\\_SpeedX.htm](http://envirospec.com/Chem_SpeedX.htm)

### Stop all that scrubbing.

#### Bond Breaker

Did you know that pollutants attach themselves to painted metal surfaces through electrostatic bonding — a process commonly known as static cling?

**Bond Breaker**, EnviroSpec's premier **car and truck detergent** does just as the name implies: it breaks that invisible bond, on a chemical level. So instead of applying, scrubbing, then rinsing, you simply apply and rinse. The hardest, most time-consuming part is done for you. And the **job is finished sooner.**

So will you go home early, or use the extra time to go out and earn more money? EnviroSpec can't help you with everything — you'll have to make

that decision yourself.

## SAVE EVEN MORE

### Free chemicals for field testers

New **EnviroSpec detergent products** aren't shipped until they've been approved by a select group of professional contract cleaners. From their testing and feedback, we tweak our formulas until they meet the highest standards. Interested in free and discounted chemical products? Visit the website to find out about becoming an EnviroSpec Certified Product Evaluator. Questions? Call 912-487-1778 and ask for Joseph.

### Bare Bones equipment for sale

**EnviroSpec offers a range of** low-cost items for thrifty budgets. They might not have all the bells and whistles, but they're still good, sturdy products you can depend on. Go to [EnviroSpec.com](http://EnviroSpec.com), click on *View Catalog*, then on *Pressure Washers*, then scroll down and click on *Bare Bones Series*.

### 20% off, just because we like you

And we like you because you placed your order **online**, which costs us less to process. So we pass the savings back on you, as a 20% discount for all online orders.

### As a special bonus...Bonus Bucks

Okay, say you spend \$500 this month on stuff from **EnviroSpec**. You then get 10% of that, or \$50 in Bonus Bucks, to apply to next month's purchase. Find out more about how it works, and how much you'll save, when you visit [EnviroSpec.com](http://EnviroSpec.com) and click on *Bonus Bucks*.

### Don't you hate shipping costs?

We don't blame you. That's why, in most cases, **shipping from EnviroSpec is free.** That's a huge savings, month after month, that let's you keep more of your hard-earned money.
