

Prices Slashed

EnviroSpec has always worked to have the best prices in the industry. I want to acknowledge the fact that a lot of the companies we service are having a tough go of it while the economy struggles. Over the past few years it has been a long hard road we have traveled, and it looks like there are a few hard miles left.

Our business success is tied to your business success. So the question is how can we help you? The answer we came up with is to lower prices to the point where it hurts. At the end of the day, this will allow you to stick some more of your hard earned money in your pocket. The price drops are significant. You will see the difference by looking at the prices below. Many of the parts that you need the most are much lower. Our buying power has increased and with it so has our ability to bring you quality parts at lower prices. Remember, at these prices you are still getting free freight on these parts too.

I hope this news brightens your day a little. All of us here will continue to do our best to serve your needs. We greatly appreciate your patronage.

Web Orders

We do our best to run a tight ship. One way we can reduce operating expenses is having customers place their orders through our website. It is the most up to date and complete listing of what we sell. Our ability to edit the content online gets new product information and pricing to you immediately.

In a tight economy it can be a real challenge to replace that old pressure washer or buy that new pump. That's why our Bonus Buck program is so important. 25% of the money you spend on chemical and 10% of the money you spend on parts from July until February 2011 gets converted into Bonus Bucks and is held in your account. You need to buy parts and chemical anyway, so next February those banked Bonus Bucks can help you get the new equipment you need. Here is an example, buy a drum pack of Prodigy now. It's \$119.95. 25% of that is \$29.88. If you use that "banked" \$29.88 next February, your real cost for the Prodigy drum pack becomes \$90.07. Maybe those Bonus Bucks will enable you to start next year with a new pressure washer. Even if you don't need equipment your Bonus Bucks can be used to help you buy parts and chemical too. Not a bad deal, huh?

Bonus Bucks

During the first 3 weeks of our Bonus Bucks program customers have banked almost \$19,000.00 Bonus Bucks. Our program goal is for our customers to have a minimum of \$300,000.00 set aside for them to use next February. We want everybody getting a great start to the 2011 washing season.
