# FIBERX

...is an environment friendly, NON-CAUSTIC DETERGENT containing Optical Brighteners that works wonders on a variety of surfaces such as wood, most carpets and fabrics. It can be used to clean grout and tile. It is also a great laundry detergent and bleach substitute. FIBERX is great for cleaning cedar shakes, decks, and unpainted surfaces. It can also be used to restore antique furniture.

**THIS PRODUCT DOES NOT  
CONTAIN BLEACH OR PHOSPHATE**

### MIXING INSTRUCTIONS:

Mix 2-1/2 to 5 pounds to a 5 gallon pail containing approximately 4.5 gallons of hot water and stir 10 times. Although the product will not be completely dissolved it's natural oxygenation process will dissolve the remaining product as you are using it. Mix only what you will use in 30 minutes otherwise the product will exhaust itself.

**Application:** There are several ways in which FIBERX can be applied. For large areas we recommend a 115 volt or 12 volt ShurFlo pump. When using a pump-up sprayer you should exercise caution since this product generates it's own oxygen resulting in internal pressure build-up in an enclosed container. Apply heavy coat to the area to be cleaned.

**Dwell Time:** Initial Coat - Spray onto surface and allow to stand for approximately 15 minutes. Rinse lightly before the brightener coat is applied.

**Brightener Coat:** After the initial process is complete apply a second coat (brightener coat) & allow to stand for another 15 minutes & rinse well with low to medium pressure - 1000-1500 PSI.

**FOR PROFESSIONAL USE ONLY**

### Health & Safety Information

#### EFFECTS OF OVER EXPOSURE

- **Ingestion:** Damage to renal system may occur
- **Eyes:** Causes severe eye irritation
- **Skin:** Causes skin irritation
- **Inhalation:** Causes respiratory tract irritation

#### EMERGENCY FIRST AID PROCEDURES:

- **Ingestion:** Give 2 glasses of water. Call physician and follow recommendations given. Never give anything by mouth to an unconscious person
- **Eyes:** Immediately flush eyes with flowing water for at least 15 minutes, holding eyelids apart to irrigate thoroughly. If irritation persist get medical attention.
- **Skin:** Immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing. If irritation persist get medical attention.
- **Inhalation:** Remove to fresh air. If breathing is difficult, oxygen may be given, preferably with a physician's advice. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get immediate medical attention.
