For Industrial or Professional Use Only
KEEP OUT OF REACH OF CHILDREN

GLASS DE-ETCH

is an ultra high grade polishing compound.

A MUST HAVE FOR MOBILE CONTRACTORS

A lesser grade of this compound is used to polish out scratches
on expensive crystal such as that found on Rolex Watches.

REMOVES SOAP SCUM & SMALL SCRATCHES ON WINDOWS

MIXING INSTRUCTIONS

Add water to product and stir until
product is about the viscosity of
pancake batter.

APPLICATION:

Wipe a fair amount onto glass and using
high speed buffer (1750 rpm) polish in
compound while applying slight
pressure.

Do not apply too much pressure as this
could cause the glass to break.

If compound begins to dry while buffing
spray with water or glass cleaner in
order to keep product moist.

Caution: Physical damage could occur.

Health & Safety Information EFFECTS OF OVER EXPOSURE

- Ingestion:** Damage to renal system may occur
- Eyes:** Causes severe eye irritation
- Skin:** Causes skin irritation
- Inhalation:** Causes respiratory tract irritation

Emergency First Aid Procedures:

- Ingestion:** DO NOT give anything by mouth. Do not leave victim unattended. If vomiting occurs, or if comatose or lethargic, place victim on the left side with the head down. Seek medical attention immediately.
- Eyes:** Flush with copious amounts of water until all material is removed. If irritation develops or persists, get medical attention.
- Skin:** Thoroughly wash exposed area with soap and water. Remove contaminated clothing.
- Inhalation:** Remove to fresh air. If breathing is difficult, oxygen may be given, preferably with a physician's advice. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get immediate medical attention.
