KEEP OUT OF REACH OF CHILDREN

HOOD-PRO

is a **NON-CAUSTIC DETERGENT**

Super Heavy Duty Restaurant Exhaust Hood Cleaning Compound
that quickly removes heavy grease and oils.

This Product Contains:

“Emulsifying” & Grease “Release Agents”

Hood Pro is surface safe.
It is less hazardous to employees
than caustic products.

BLENDING INSTRUCTIONS Non-Caustic Powdered Detergents

Remember - warm water (not to exceed 120°F) will always make powders go into solution easier. If cold water is used manual agitation may be necessary.

EnviroSpec products are manufactured in such a manner as to insure that once the product is totally dissolved that it will stay in solution for a very long period of time.

When mixing, fill a clean poly drum approximately 50% full of warm water and add Liquid.

#1. Place the nozzle of a high pressure washer close to the bottom and continue filling/blending for one minute. Next slowly add the powder while continuing to fill. At 80% full add Liquid.

#2. Continue filling until full.

Product is now ready to use.

Health & Safety Information EFFECTS OF OVER EXPOSURE

- Ingestion:** Damage to renal system may occur
- Eyes:** Causes severe eye irritation
- Skin:** Causes skin irritation
- Inhalation:** Causes respiratory tract irritation

Emergency First Aid Procedures:

•**Ingestion:** Dilute the alkali by giving water or milk immediately and allow vomiting to occur. Examine victim for possible corrosive injury to mouth and throat and irrigate the areas with a 1% Acetic Acid until alkali is completely neutralized. Avoid gastric lavage or emesis. (Dreisbach, Handbook of Poisoning, 11th Edition). Maintain airway and treat shock. If vomiting occurs, keep head below hips to help prevent aspiration. Get medical attention immediately.

•**Eyes:** Flush with copious amounts of water until all material is removed. If irritation develops or persists, get medical attention.

•**Skin:** Thoroughly wash exposed area with soap and water. Remove contaminated clothing

•**Inhalation:** Remove to fresh air. If breathing is difficult, oxygen may be given, preferably with a physician's advice. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get immediate medical attention.
