For further information call:  
1-800-346-4876

**DISTRIBUTED BY:**

# ORANGE PEEL SOLVENT EXTERIOR HOUSE WASH

## BLENDING INSTRUCTIONS Non-Caustic Powdered Detergents

Remember - warm water (not to exceed 120°F) will always make powders go into solution easier. If cold water is used manual agitation may be necessary.

EnviroSpec products are manufactured in such a manner as to insure that once the product is totally dissolved that it will stay in solution for a very long period of time.

When mixing, fill a clean poly drum approximately 50% full of warm water and place the nozzle of a high pressure washer close to the bottom and continue filling while adding the powder slowly. When the drum is 90% full all of the powder should have been added. Continue filling until the drum is full.

Product is now ready to use.

Note: If this product has a liquid additive - the additive should be added last.

**READ & UNDERSTAND**  
the MSDS Prior to Use

For Industrial or Professional Use Only  
**KEEP OUT OF REACH  
OF CHILDREN**

## Health & Safety Information EFFECTS OF OVER EXPOSURE:

- **Ingestion:** Damage to renal system may occur
- **Eyes:** Causes severe eye irritation
- **Skin:** Causes skin irritation
- **Inhalation:** Causes respiratory tract irritation

### Emergency First Aid Procedures:

- **Ingestion:** Dilute the alkali by giving water or milk immediately and allow vomiting to occur. Examine victim for possible corrosive injury to mouth and throat and irrigate the areas with 1% Acetic Acid until alkali is completely neutralized. Avoid gastric lavage or emesis. (Dreisbach, Handbook of Poisoning, 11th Edition). Maintain airway and treat shock. If vomiting occurs, keep head below hips to help prevent aspiration. Get medical attention immediately.
- **Eyes:** Flush with copious amounts of water until all material is removed. If irritation develops or persists, get medical attention.
- **Skin:** Thoroughly wash exposed area with soap and water. Remove contaminated clothing. Launder contaminated clothing before reuse.
- **Inhalation:** Remove to fresh air. If breathing is difficult, oxygen may be given, preferably with a physician's advice. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get immediate medical attention.
