EVERYTHING LAST LONGER WITH A 'QUANTUM-Z'

Apply 10% of your available bonus bucks to anything you order in March 2012!

new from...

EnviroSpec

...the people who have brought more great products & ideas to the Mobile Wash Industry than all other companies combined now brings you the...

'QUANTUM-Z' UNLOADER

The unloader that replaces **EVERY** unloader in the industry!

try the pinky test!

Why a Quantum-Z?

Every time you pull & release the trigger using a trapped pressure unloader you are 'hammering' away & reducing the life of virtually every component on the pressure washer. Trigger guns, hoses, pumps, engines, motors, quick connects all take a 'beating' with trapped pressure unloaders.

so...

if-u-use...

FLOW UNLOADERS

that you are constantly replacing or adjusting...

or if-u-use...

TRAP PRESSURE UNLOADERS

that knock your teeth out every time you pull the trigger...

...you can now 'trash' them all!

The new 'Quantum-Z' is just one more reason why more Mobile Washers call EnviroSpec!

HOW SWEET YOU ASK?

This is the only unloader in the industry that has passed our 'pinky' test.

THAT'S RIGHT!

Using any trigger gun in the industry a two year old can pull the trigger with their little pinky!

The 'Quantum-Z' has **ALL** of the **GREATEST FEATURES** of every unloader you have ever liked and **NONE** of the problems of any unloader that you have ever used!

'Zero' pressure resulting in a 'limp' hose while in by-pass!

Unlike the K-7's & 5's one unloader fits any system within the unloaders advertised Pressure & GPM range.

Another great feature is... you will never have to purchase an 'easy-pull' trigger gun again!

1-800-346-4876

AU1145 - up to 11 GPM & 4,000 PSI **\$139.95**
Direct Replacement for all flow & pressure unloaders

AU2145 - up to 21 GPM & 4,000 PSI **\$241.95**

Allison "Super Suds Sucker" - Up to 33+ % DRAW

The Original "Super Suds Sucker" is back!

For those of you to new or young to remember...

...a few years back we designed a chemical injector that would just about suck the bottom out of the pail. Not only that - we were able to put as much as 500' of hose on the machine and still suck as much chemical as most injectors equipped with only 50' of hose.

Here are the two primary advantages of owning a **Super Suds Sucker** and when you think about it - what else is there?

Longevity - This could be the last injector you will ever buy. Most of the ones we built 10 years ago are still 'sucking' strong.

Product to Surface - When we first came out with this product we told people then that "if you can't get the product to the surface you may as well stay at home" - the same holds true today. With a **Super Suds Sucker** you will definitely get the product to the surface.

1-800-346-4876

ON SALE

1964 \$ 43.65

Less 10% BB*

Super Suds Sucker comes with additional nozzles that will handle from 2 to 10 GPM. Complete with... quick connects, chemical line & chemical filter. **READY TO GO!**

What do most people say when they first try it?

NOW THIS SUCKS!

Allison Severe Duty Performance Pumps

LESS \$100.00 OF YOUR BONUS BUCKS

**I'LL GUARANTEE YOU..
THAT I HAVE THE BEST PUMPS
WHO ELSE WILL DO THIS!**

Allison Severe Duty Pumps will run harder & last longer than any pump in the industry and to show you just how confident we are that our Severe Duty pumps are better all you have to do is look at this warranty.

- Exclusive 2-year 'bumper to bumper' warranty with renewable service plans.
- Heavy Duty Reinforced Brass Heads with External and Internal Bracing.
- Large Diameter Stainless Steel Valve Caps with Increased Thread Depth.
- Oversized Bearings for greater belt 'side-loads' means longer pump back-end life.
- Heavy Connecting Rod Assemblies with Guide Pins for Perfect Cap Alignment.
- 'State of the Art' Packing Design means longer, uninterrupted run-times.
- Cool-run Technology and Extra Capacity Oil Sumps promote longevity.

If anything happens in the first two years we will

FIX IT FREE!

**2-YEAR
'BUMPER to BUMPER'
WARRANTY**

JUST HOW GOOD IS AN
Allison
Severe Duty Performance Pump?

EnviroSpec will provide a full 2-year 'Bumper to Bumper' warranty on these two Allison Severe Duty Pumps. Just return it to us pre-paid and a certified systems technician will replace any worn parts such as check valves, packings, oil seals or anything else that is showing signs of wear and the possibility of 'downtime.' We will also perform a 42-Point Inspection, clean and change the oil and make sure your pump comes back to you in 'like new' mechanical condition.

Our job and promise is to keep your equipment running with little to no down time and we do that by providing our customers with a certified pump inspection and service program that you can't get anywhere else.

SPECIAL NOTE: Just because the pumps GAS HP requirement may seem to be higher than the engine you have - these pumps will still work with any engine that you have so long as it has a 1" engine shaft. You will just have to adjust your pressure lower than the rated pump pressure. You will still get the same GPM - just less pressure. For example: If you need a lot of volume and not as much pressure you could run the 5.6 GPM Pump with a 13 HP engine and adjust your pressure to 2500 PSI rather than the maximum rated pressure of the pump. Call with questions - it really is easy to do.

Allison TNT SERIES MINI SKIDS

DUAL-GUN STANDARD ON 8 & 10 GPM SYSTEMS

New for
2012
TNT SERIES

'Power in the hands of a few'

These are the Industry's Best Pressure Washer Values and here is why...

We all use the same engines, pumps, unloaders, generators, burners, nozzles, hoses, lances, guns, flow switches, pressure switches, filters, burner nozzles, safety valves, belts, pulleys, water filters, etc.

So - what is left? The Paint? The Frame?

Really - the only thing that is different is that we use the Best of the above!

Plus - we just don't need to make as much as they do - nowhere near as much!

Systems Include:

- Featuring the New 2012 KOHLER & Vanguard Engines
- Tri-Plex pump with ceramic coated pistons, extra large oil-bath and oversized 'full-load' bearings
- Safety pressure relief system that by-passes over pressurized water
- 4-each premium high pressure quick connect nozzles and 1-each premium quick connect soap nozzle
- Injector, Hose, Gun & Lance sold separately

UP TO 1-MILLION BTUS

New for
2012
HORIZONTAL SERIES

There is 'red hot' and then
there is a **hotter hot...**

WHITE HOT

These are the Industry's Best Pressure Washer Values and here is why...

We all use the same engines, pumps, unloaders, generators, burners, nozzles, hoses, lances, guns, flow switches, pressure switches, filters, burner nozzles, safety valves, belts, pulleys, water filters, etc.

So - what is left? The Paint? The Frame?

Really - the only thing that is different is that we use the Best of the above!

Plus - we just don't need to make as much as they do - nowhere near as much!

Systems Include:

- Featuring the New 2012 KOHLER & Vanguard Engines
- Tri-Plex pump with ceramic coated pistons, extra large oil-bath and oversized 'full-load' bearings
- Safety pressure relief system that by-passes over pressurized water
- Premium flow or pressure switch that controls burner firing sequence
- Premium Series Beckett Burner equipped with Beckett's precise fuel delivery management system
- Schedule 80 vertical dual-pass coil system
- Marine grade battery compartment with cover for added protection & battery life
- Oversized fuel & gas tanks
- 4-each premium high pressure quick connect nozzles and 1-each premium quick connect soap nozzle
- Injector, Hose, Gun & Lance sold separately

PRODIGY

SALE
\$109.00

How good is it?
We have one customer who purchases 5,500 drum packs a year!

CONTAINS SUPER GLOSS ENHANCERS

Prodigy is, by far, one of the highest non-caustic detergent concentrations available in the industry. Prodigy exhibits excellent wetting, chelating, rinsing, and emulsification properties due to its high concentration of our SuperFlo Polymer Complex System. This exotic complex is formulated from a variety of unique dispersants, hydrotopes, and surfactants, which are not commonly found in detergent formulations.

The general rule of thumb in detergent formulation is as follows: Approximately 1 gallon of water will hold approximately 1 pound of powder before separation begins. If your product begins to separate using this method, more often than not, your product has been camouflaged with what is known in our industry as "fillers". Fillers provide little to no value to the products integrity and/or performance. They are used primarily to add weight and increase the bottom line profit for the manufacturer. Using the 1 pound per 1 gallon rule, you can see the potency of Prodigy when you consider that we are able to thoroughly dissolve up to 2.3 pounds of Prodigy into 1 gallon of water without separation. To our knowledge, no other company can make this claim. The advantage of these concentration levels are twofold: 1) the contractor is now able to clean substrates that normally require the use of caustic cleaners and 2) work faster and safer, which increases your bottom line.

As the leader in contract cleaner formulations, EnviroSpec goes to great lengths in providing products that are both environment friendly as well as effective, an attitude not commonly found in such a demanding industry.

Since PRODIGY came out in 1986 it has grown to be the most asked for Truck Wash Detergent in the Mobile Wash Industry.

5 GAL #PRO5 \$29.95
55 GAL #PRO55 \$119.95

MR. MUSCLE

SALE
\$160.00

What is Mr. Muscle?
PRODIGY with extra Grease Cutters!

CONTAINS 'EB' SOLVENT BOOSTERS QUICK RINSE ADDITIVES AND EXTRA GLOSS ENHANCERS

Mr. Muscle has a 40 pound base of Prodigy, the industry's #1 Selling Tractor/Trailer Wash, plus 2.5 gallons of solvent/surfactant additive that really cranks up the horsepower and safely cuts through the heavy build-up of carbonaceous pollutants such as the exhaust typically found on over-the-road trailer bodies and 'fifth-wheel grease!'

Mr. Muscle runs circles around all the degreasers found in the marketplace and at a price that is well below what you would expect to pay for such a product.

In addition, you will find it to work extremely well with both hot and cold water systems. The addition of SpeedX-777 which is part of the liquid additive makes rinsing a breeze.

Mr. Muscle exhibits excellent wetting, chelating, rinsing, and emulsification properties due to its high concentration of our SuperFlo Polymer Complex System. This exotic complex is formulated from a variety of unique dispersants, hydrotopes and rinse aids which are not commonly found in detergent formulations.

Typical applications for the concentrate are:
Tractor/Trailer Bodies, Engines, Fork Lifts,
Garage Floors, Rail Cars

EnviroSpec goes to great lengths in providing products that are both environment friendly as well as effective.
