Competitively Priced!

NEW! Smaller, lighter, economical!

"LITTLE FLOATER" SURFACE SPINNER

These 12" and 16" surface cleaners use force generated by your pressure washer to spin 2 spray nozzles at high speed, actually "floating" the spinner over the surface like a hover craft —which maximizes cleaning in small spaces and on uneven surfaces: sidewalks, driveways, pool decks, patios, roofs, etc. There are no wheels to hang up. And using a small, lightweight Little Floater is easy on the operator!

- FEATURES** • Heavy-duty 12" or 16" floating aluminum deck • Lightweight • Heavy-duty construction • 2-piece detachable handle for easy storage • 3000 PSI maximum • 200° F temperature • Heavy-duty nylon brush • Balanced spray bar • Powder-coat painted handle • Removable spray tips • Long-lasting, dependable, heavy-duty swivel

HOW DO YOU READ A NOZZLE CHART?

Go across the top row Left to Right and find your PSI.

When you find your PSI go DOWN in that column until you find your GPM. If you do not find the EXACT GPM use the one which is slightly LOWER.

Now Follow the line Right to Left until you get to the nozzle column and that is the hole size that you will order.

EXAMPLE: Your machine is 5.6 at 3,500 PSI Go across the TOP until you find 3,500 PSI - NOW GO DOWN until you find "5.20" (not 5.7) - NOW GO LEFT until you get to the Nozzle Size Column - SEE - right there it says you need a 5.5 NOZZLE - WoW!

Please Order by Part Number

NOZZLE CHART

NOZZLE SIZE	100 PSI	1,000 PSI	1,500 PSI	2,000 PSI	2,500 PSI	3,000 PSI	3,500 PSI	4,000 PSI	5,000 PSI

What goes where?

Thanks for asking...

...because we are tired of being blamed for a lot of people ordering the wrong Plugs & Couplers!

First of all, you need to know the correct starting point. Please do not rely on the pressure washer manufacturer or typical distributor to be able to tell you the correct Quick Connect Set Up. They have both been doing it wrong for years.

Direction of Flow is commonly indicated by an arrow. Now let me ask you - which looks more like an arrow...

Item A

or

Item B

Direction of FLOW

If you picked "A" you are correct. So why, you ask, doesn't the manufacturer put them on right? Who knows! Maybe they were never Mobile Washers.

"IF" you have your System set up correctly with the plug indicating the direction of FLOW you can use the following as a guide.

Outlet of Coil/Pump = Plug

Inlet of Injector = Coupler

Outlet of Injector = Plug

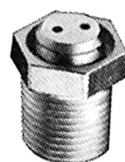

Inlet of HP Hose = Coupler

Outlet of Hose = Plug

Inlet of Trigger = Coupler

Here is the only exception:

If you are using Quick Connect Nozzles you will need a Coupler on the outlet side of the lance

THERMAL RELIEF VALVE

Keeps Pump Head from overheating while in by-pass. Opens at 145 degrees.

#1410-111 \$9.95

FOR PRESSURIZED SYSTEMS ONLY

FOR WATER TANKS USE THE TERMINATOR

HI-PRESSURE SWIVELS

Swivels Under Pressure

Install a 3/8" swivel on the inlet side of the trigger gun to keep the hose from tangling and a 1/4" swivel on the outlet side of the gun for lance rotation.

KOHLER ENGINES

RUNS QUIETER, LONGER

15 HP comes Standard with:

Engine Mounted Controls - Low Oil Shut-down
1" Key Shaft - 3.5"L Drive Shaft

15 H.P #44502 15 AMP \$699.00
Muffler #1278613 \$ 84.95

The Following Engines are

**SPECIAL KOHLER SPEC
FOR HIGH PRESSURE PUMPS**

18, 22 & 25 HORSEPOWER

Standard with:

Engine Mounted Controls - Low Oil Shut-down
Muffler sold separately

#K18 18 HP 1" Shaft 20 AMP \$ 950.00
#K22 22 HP 1" Shaft 20 AMP \$1,095.00
#K25 25 HP 1" Shaft 20 AMP \$1,175.00

**25 AMP ADD ON:
#K25A \$100.00**

THROTTLE CONTROL

36" THROTTLE CABLE

Stop working the engine & pump during by-pass. Speedmaster reduces engine speed when pump head pressure drops below 250 PSI. Reduces pump head heat build-up!

Easy Installation

#8822-101 \$ 44.95

HONDA ENGINES

#GC160	5.0	Recoil	\$236.00
#GX340	11.0	Recoil	\$646.00
#GX390	13.0	Recoil	\$697.00
#GX620	20.0	20 AMP E/Start	\$975.00

Tough Products, Gentle Prices.

EXTEND YOUR PRODUCTIVITY WITH... EXTEND-A-WAND

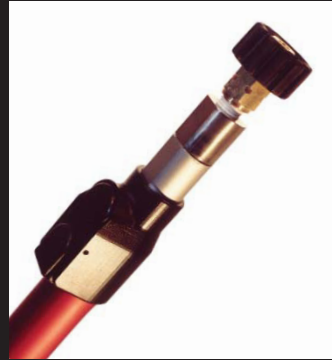

WHAT MAKES IT THE BEST?

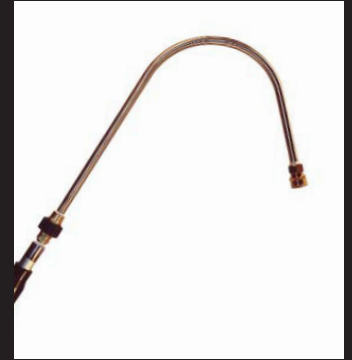

PIN-LOK adjustment design enables the operator to extend and retract the wand fast...up to 10 X FASTER...saving you time and money...no screw connectors to hassle with.

The universal gun mount and Suttner's ST2605 gun along with a unique mounting system makes field repairs quick and easy with just two allen screws.

Flat sided aluminum tubing extensions keep the cleaning nozzle inline with the gun...saving frustrating alignment time. The servicable end fitting allows for quick maintenance to the hose.

Extendawand offers quick attach cleaning accessories for every job from industrial to residential. Available are Rotating Nozzles, Brushes, Gutter Cleaning, Window Washing, Roof Washing.

MORE FEATURES FOR GREATER PROFITS:

- Thick wall extruded aluminum construction
- Extensions do not ride on one another eliminating binding up
- Reinforced impact resistant injected molded parts throughout
- Thermal comfort grip, no gloves required even at 210 F

SIX MODELS... ONE FOR EVERY APPLICATION.
