

EnviroSpec

Thank you for your service

**WOUNDED WARRIOR
PROJECT**

Shelley & I both are veterans of the Vietnam war. Because of the unpopularity of that war I will never forget how uncomfortable I felt around people when I returned home.

I recently read an article about that war that went something like this... 'television brought the brutality of the Vietnam war into the comfort of the living room. Vietnam was lost in the living rooms of America and not on the battlefields of Vietnam and it is only now that people are beginning to separate the politics from the warriors of that war.'

This past year I was in an Airport in Jacksonville, FL waiting on the arrival of a friend when I noticed an older gentleman walk up and shake the hand of a young soldier who was standing nearby. He looked him square in the eye and said 'thank you for your service.' A few weeks afterwards I was in Best Buy picking up a few things and a fellow about my age who was in the middle of a conversation with a salesperson saw me and abruptly walked away from the conversation - came over to me, extended his hand and said 'thank you for your service.' After saying 'you are welcome' I realized I was wearing a Vietnam Vet baseball cap that I had recently picked up at the base exchange. That was the first time in 44 years that I felt proud about my service to my country.

I took away from those experiences a daily reminder of just how important it is to show our appreciation to those young men and women who we ask to take up arms to fight our battles in the name of freedom.

The next time you see a soldier walk up to him or her - extend your hand and say 'thanks for your service.' The exchange will probably be something like 'you are welcome' which may seem to you like a casual response but I can assure you that not very deep down inside of that soldier the blood will begin to rush, the chest will tighten and the pride of that soldier is elevated to unimaginable heights. We ask them to do a job, they proudly obliged and we said 'thanks' for all you do to keep us safe and free.

For all who have served Shelley & I would like to say 'thank you for your service' and let us never forget those who made the ultimate sacrifice for our country. May they remain in our hearts and prayers forever.

Mr. MUSCLE

VOTED
THE INDUSTRY'S
#1 DEGREASER

'FULL-DRESS'
DETERGENTS

What is Mr. Muscle?
PRODIGY with extra Grease Cutters
CONTAINS 'EB' SOLVENT BOOSTERS
QUICK RINSE ADDITIVES
AND EXTRA GLOSS ENHANCERS

Mr. Muscle has a 40 pound base of Prodigy, the industry's #1 Selling Tractor/Trailer Wash, plus a 2.5 gallon container of multiple solvent additives that really cranks up the horsepower and safely cuts through the heavy build-up of carbonaceous pollutants such as the exhaust typically found on over-the-road trailer bodies and fifth-wheel grease.

Mr. Muscle runs circles around all the degreasers found in the marketplace and at a price that is well below what you would expect to pay for such a product.

In addition, you will find it to work extremely well with both hot and cold water systems. The addition of SpeedX-777 which is part of the liquid additive makes rinsing a breeze.

Mr. Muscle exhibits excellent wetting, chelating, rinsing, and emulsification properties due to its high concentration of our SuperFlo Polymer™ Complex System. This exotic complex is formulated from a variety of unique dispersants, hydrotopes and rinse aids which are not commonly found in detergent formulations.

Typical applications for the concentrate are:

Tractor/Trailer Bodies, Engines, Fork Lifts, Garage Floors & Rail Cars

Our Favorite CHARITIES

EnviroSpec donates 100% of the after tax profits from our Chemical Sales to the Shriners Hospital for Children in Tampa, FL. and to Suzie's Friends No-Kill Animal Shelter/Sanctuary located in Homerville, GA.

In 2002 John & Shelley Allison, owners of EnviroSpec, traveled the highways and by-ways of their local communities and began picking up and helping abandoned, hungry and sick animals. That initial 'labor of love' has grown to become a major commitment in their lives.

In the last five years they have trapped and spayed/neutered over 2000 cats & dogs. On the weekends they take animals to PetsMart where they find homes for the ones who have been or can be socialized. Those who don't find homes are returned to their colonies and every morning at 6:15 and every afternoon at 4:45, 7-days a week, John & Shelley head out in their golf cart, better known as 'Suzie's Meals on Wheels', to feed and monitor the colonies.

Back at their No-Kill Shelter/Sanctuary in Homerville the employees of EnviroSpec start and end their day by providing the animals there with the same attention and care as those in the colonies receive.

Please consider helping a Shelter or Rescue in your area. It's a great feeling knowing that you have helped an abandoned, helpless & hungry animal who otherwise would never have had a chance. And never forget the tireless work of helping children in communities throughout the Nation that is silently performed by Shriners everywhere.

[PLEASE SPAY/NEUTER YOUR PETS.](#)
because an unborn animal will never die
a lonely death in an animal shelter.

BOND BREAKER

Contains **STATiX™**

An exclusive product of EnviroSpec
specifically formulated to eliminate
'STATIC CLING' ON VEHICLE SURFACES

Bond Breaker is the most incredible product of its kind in the industry. Bond Breaker removes more 'road film' and surface oxidation (dead paint) from vehicles than any 'non-caustic' product on the market.

Most manufacturers attempt to remove 'road film' through the use of caustics such as Sodium or Potassium Hydroxides which are typically found in the paint stripping or exhaust hood cleaning industries. When these products are used a microscopic layer of paint is also removed. As the process continues the vehicle surface oxidizes and becomes dull.

Bond Breaker utilizes a unique blend of builders and surfactants that include SuperFlo Polymer™ & STATiX™ to break that magnetic field. When broken all pollutants & oxidation 'rolls' off the surface.

As Mobile Washers we invented

EnviroSpec 'SUPER SKID'

Since
1972

Do you remember what you were doing in the year 2000?

I do! I was selling this exact same pressure washer for

\$2,995.00

I enjoyed that year! How about you?

The fact is that I enjoyed it so much that
I am going back to that same price!

\$2,995.00

and YES! It has all the same 'bells and whistles'!

Vertical Coil & No Substitutions

System Includes:

- The New 2011 18 HP Briggs Vanguard Engine with a robust 20 AMP recharging system w/3-year warranty
- Low -oil engine safety shut-down protection
- Tri-Plex pump with ceramic coated pistons, extra large oil-bath and oversized full-load bearings
- The industry's only 2-year 'bumper to bumper' pump warranty that includes everything but abuse*
- Rugged pump adjusting plate that makes belt tensioning, removal and replacement easy
- Premium pressure actuated unloader for years of 'trouble free' work
- Safety pressure relief system that by-passes over pressurized water
- Premium flow/pressure switches that controls burner firing sequence
- Premium Series Beckett Burner equipped with Beckett's precise fuel delivery management system.
- Schedule 80 vertical coil with 4-pancake firing plate that produces super hot - 195° plus - water
- Marine grade battery compartment with cover for added protection & battery life
- Oversized 10 gallon fuel & gas tanks that will run for days instead of a few hours**
- Allison 'Super Suds Sucker' Chemical Injection that allows for chem draw with as much as 300'+ of hose
- High pressure hose with 1-wire braid rated to 4,000 PSI working pressure and 12,000 PSI burst pressure
- Premium trigger gun that is rated for pressures much higher than system working pressure and temperature
- Premium lance assembly equipped with a corrosion resistant 'nozzle quick coupler'
- 4-each premium high pressure quick connect nozzles and 1-each premium quick connect soap nozzle

EnviroSpec's ALLISON FOAM TURBINE

The New Allison Foam Turbine develops an aerated wet foam. The system starts with the Allison '2-in-1' Dual Port Injection System and includes our 1/2" stainless steel Foam Turbine that is equipped with a detachable angle spray nozzle that once removed will provide you with a 0° nozzle that reaches up to 30' up.

This Foam Turbine / Dual Port Chem Inductor gives the operator many options some of which include:

1. Stand alone chemical injection that will draw chemical at a rate up to 22% from either of the two adjustable mixing knobs.
2. Attach one of the mixing knobs to detergent and the other to another product such as bleach, wax, etc. That typically will not hold up when mixed directly into a detergent solution. This way you are mixing as they enter the water stream where they will not have an opportunity to separate.
3. Attach the Allison Foam Turbine to the end of the wand , close off one of the adjustable mixing knobs to produce the industry's best pure wet foam.
4. Attach the Allison Foam Turbine to the end of the wand and place the chem line from one of the mixing knobs into your favorite foaming detergent and adjust the other mixing knob to allow a small amount of air to be pulled into the line. By doing so you will be able to adjust the foam consistency.
5. When using this Allison Dual Port Induction System consider the second port as a 'spare' injector. If one side quits drawing simply close that side down and attach the chemical pick-up line to the other side of the injector.
6. In comparing this system to typical lance end nozzles such as the X-Jet which is designed to throw chemical up to 3-stories just remember the Allison Foam Turbine System is throwing foam rather than diluted chemical and it is doing so without having a second chem line attached to the end of the lance that you have to drag along.
7. Without the detachable nozzle the Foam Turbine will throw foam as high as 30'.

LIMONENE

55 GALLONS
\$125.00
WE PAY FGT

Contains Pure d'Limonene Solvent

Exterior House Wash

**Orange Peel Solvents and
High Yield Gloss Enhancers**

In recent years the evolution of the environment conscious homeowners are becoming much more educated in the field of exterior house washing. They are saying 'no-more' to the contractors who are using the unfriendly bleach and harsh detergents such as 'caustic' that has been so popular for so long simply because it is inexpensive to purchase and, until now, there have been few alternatives for removing mold and mildew.

The solvency in Limonene originates from citrus by-products such as orange and lime peels. These solvents, coupled with specific pH balanced surfactants and builders, provide the contractor with an excellent product that quickly removes carbonaceous pollutants such as mold/mildew, gutter streaks, oil and grease and other fallout pollutants commonly found in the house washing industry. For the first time ever they are experiencing safe and effective surface chemistry that deals with wood, aluminum and vinyl siding and the pollutants common to those surfaces.

Limonene has excellent hydrotoping characteristics through the use of a unique dispersant complex which is not commonly found in detergent chemistry. This complex, known as SuperFlo Polymer, has been developed by EnviroSpec and is found throughout our detergent formulary because of its tremendous ability to add horsepower to virtually every type of alkali detergent products while remaining much more gentle than the alternatives. You will find that Limonene has superior rinsing qualities in both hot and cold water environments which results in cleaning faster and safer.

on this item

HOOD PRO

**Specifically Formulated For
RESTAURANT EXHAUST HOOD CLEANING**

10 years ago they were skeptical. Today more contractors are using Hood Pro as their First Choice over the strongest Caustics on the market!

Until now Professionals have always had to rely on corrosives for the real tough hood cleaning jobs but not anymore! Hood Pro has revolutionized the industry by providing the contractor with a product that cleans as quick and effective as the 'hottest' hydroxide products in the industry while leaving him/her completely 'scar free' and with hair still on his arms when the job is complete. Only a Professional Exhaust Hood Contractor can fully appreciate that statement.

EnviroSpec's HOOD PRO product is the non-caustic workhorse of the professional exhaust hood cleaning industry. Known for it's consistent high performance, this powerful grease dissolving formula is being used more and more by the professionals who know and understand the disadvantages of using sodium or potassium hydroxide products. The "power" from Hood-Pro comes mainly from a wide variety of special 'ion' charged surfactants not commonly found in the detergent formulary industry. Coupled with a unique "builder" base, HOOD-PRO exhibits unbelievable pH stability and excellent foaming characteristics.

HOOD PRO offers excellent and economical grease dissolving, foaming, wetting, emulsification and biodegradability needed for today's specialized contractor. HOOD PRO is 100% active and highly concentrated. For example; the 'hottest' hydroxide products consist mainly of 50 pounds of powder to 50 gallons of water. The finished HOOD-PRO product will yield 55 gallons which is compounded from 80 pounds of the finest builders and performance driven surfactants in the industry.

5 GAL #HP5 \$32.00

55 GAL #HP55 \$225.00

HOOD PRO will respond to your most difficult cleaning project with ease and provide you with an environment which is much safer to humans and less damaging to the surface.

EMULSIFIER PLUS

The Industry's #1 Selling House Wash

55 GALLONS
\$114.95

 WE PAY FGT
 on this item

BLEACH FRIENDLY DETERGENT WITH GLOSS ENHANCERS

For the very best of all worlds start with 4 gallons of Emulsifier Plus to 1 Gallon of Bleach

Emulsifier Plus - is one of the Original House Wash Formulas developed by EnviroSpec. Our dilemma at the onset of its development stages were: we all know bleach works better than anything for killing and cleaning mold & mildew but we also knew that bleach does absolutely nothing about cleaning carbonaceous pollutants such as exhaust carbons, dirt, grease and grime. The task was - how to do both at the same time!

Bleach, for the most part, does not like to be blended with other chemical products and many of the chemical products found in the professional mobile wash industry can create a serious explosive situation when mixed with sodium hypochlorite (bleach). Emulsifier Plus, on the other hand, is the answer to both the safety issue as well as the cleaning problem. These two products work extremely well together when blended and applied in accordance with the EnviroSpec instructions. Have the best of both worlds - Clean and Kill Mildew and Clean All the other Pollutants typically found on an exterior substrate. And do it all in one pass!

Emulsifier Plus has a pH of around 11.8 to 12.0 in a 1% solution. This unique blend of Surfactants & Builders has been specifically formulated for the House Wash Industry as a stand alone detergent or a detergent additive to be blended together with Bleach.

Emulsifier Plus works great on removing heavy build-ups of grease, grime and general fallout pollutants generally found in high traffic areas and exhibits excellent wetting, chelating, rinsing, and emulsification properties. Its ability to hold pollutants in suspension during the wash process makes it an ideal product when using either hot or cold water pressure washers.
