

5-GALLON POWER

- Pop off the Lid
- 'fill' 75% with warm water
- 'stir' & 'finish filling' &...

go to work!
It is just that easy.

**WORRIED ABOUT
 EPA & OSHA
 VISITORS?**

You couldn't ask for a cleaner or safer way to store or blend chemical than on the Job Site *and out of their sight!*

The Industry's Best Detergents
RE-SELL READY!

RE-SELL READY CHEMICALS

So you buy it and have it delivered for \$29.95 and you 'just add water' snap on a new lid and sell it for \$69.95 ...makes sense to me!

DOES ANY OF THIS SOUND FAMILIAR?

- Ever had a drum leak?
- Ever had a visit from the EPA or OSHA?
- Do you always have to be around when your employees make chemical to make sure nothing goes wrong - not to mention cleaning up behind them?
- Are you constantly having to buy drum siphon pumps that always leaves a puddle of chemical on the floor?
- Are you tired of transferring chemical from a 55 to a 5 and then hauling them to an already over-crowded truck. Then when you get to the job site you find one turned over and chemical is everywhere.
- Are you tired of loading and hauling 55 gallon drums of detergent that leave a mess everywhere?
- Are you tired of looking for clean buckets to hold your detergent and then when you do find one the lid is missing?

The people who are getting rich in this business are the people who sell chemical!

HERE IS HOW IT WORKS

The lid that comes with a 5-gallon Power Pak is not substantial enough to 're-sell'. So, for an additional \$3.95 we will send you a heavy duty lid that has a Rieke 'pour-spout.' We will also provide you with a label that refers to a liquid product instead of a powder and a liquid MSDS will be included.
