

RUST-AWAY

Removes Rust Stains From Concrete

Specifically Formulated to REMOVE WELL-WATER RUST STAINS FROM CONCRETE Spray-on! Rinse-off! No Scrubbing Necessary!

***If you work or live in Florida there are two things you must have...
...a bathing suit and a box of Rust-Away!***

Rust-Away has specifically formulated to remove well-water rust stains from concrete, stucco, siding, fiberglass, and more. Simply mix 1/2 to 1 pound of **Rust-Away** rust stain remover per gallon of water and spray it on the concrete with a pump up garden sprayer and wash the house. By the time you finish **Rust-Away** is through with the concrete, it is that easy.

Rust-Away crystals are a unique blend of acids and surfactants which remove well water rust stains from most exterior surfaces. Spray dissolved solution of **Rust-Away** and water onto the surface with a chemical resistant sprayer and rinse with fresh water. Process may be repeated as necessary.

Directions for use:

Mix product with water to make 35-40 gallons of liquid concentrate. Apply to the surface with a sprayer to remove rust stains. After the desired result is achieved lightly rinse with fresh clean water. This product may be diluted for different applications; actual washing experience is the only way to determine what is right for you.

**Not for use on Brick containing iron oxide pigments.
Run a test pattern in an inconspicuous area if you are not sure.**
