## Legacy Hose Reels

### Fully assembled and ready to use!

Legacy hose reels were designed for ease of use and durability in commercial pressure washer applications.

Offering 100' and 200' reels in both a fixed base and 360 degree rotating base. The oversized reel holds the advertised length plus leaves additional space reducing the difficulty of reeling hose. The unique extended swivel improves the hose connection and reduces hose wear and stress.

### Features:

#### 1. Rugged heavy-duty construction for commercial applications.

- Heavy gauge steel fabrication
- Gloss black powder coating
- Easy to use brake mechanism reduces unwinding backlash
- Oversized heavy-duty locking mechanism prevents slippage during reel operation.
- Durable handle

#### 2. "Flip-Over" hose guide: Allows ease of use from either side of the reel

#### 3. Oversized: Oversized to easily fit the advertised length of hose. When we say 100' we mean 100+ feet will easily fit.

#### 4. New swivel design: The reels come with an extended swivel which prevents bends and stress on the hose where it attaches to the reel. Swivels carry a two year warranty.

#### 5. Rotary mount: 360 degree rotation with an oversized heavy-duty locking mechanism. Allows for continual alignment with the hose.

- Mount to round or square tubing

#### 6. Fully assembled: Ready to use out of the box. Saves time and money.

### Specifications:

- 5000 psi
- 325°F
- 100' and 200' fixed base
- 100' and 200' 360 degree rotating base
- High pressure double seal swivels.
- Reels equipped for 3/8" hose. Easily convertible to 1/2" hose with the change to a 1/2" swivel.
- 2 year warranty

# HOSE REELS

## Legacy Hose Reels

### Fully assembled and ready to use!

Legacy hose reels were designed for ease of use and durability in commercial pressure washer applications.

Offering 100' and 200' reels in both a fixed base and 360 degree rotating base. The oversized reel holds the advertised length plus leaves additional space reducing the difficulty of reeling hose. The unique extended swivel improves the hose connection and reduces hose wear and stress.

### Features:

#### 1. Rugged heavy-duty construction for commercial applications.

- Heavy gauge steel fabrication
- Gloss black powder coating
- Easy to use brake mechanism reduces unwinding backlash
- Oversized heavy-duty locking mechanism prevents slippage during reel operation.
- Durable handle

#### 2. "Flip-Over" hose guide: Allows ease of use from either side of the reel

#### 3. Oversized: Oversized to easily fit the advertised length of hose. When we say 100' we mean 100+ feet will easily fit.

#### 4. New swivel design: The reels come with an extended swivel which prevents bends and stress on the hose where it attaches to the reel. Swivels carry a two year warranty.

#### 5. Rotary mount: 360 degree rotation with an oversized heavy-duty locking mechanism. Allows for continual alignment with the hose.

- Mount to round or square tubing

#### 6. Fully assembled: Ready to use out of the box. Saves time and money.

### Specifications:

- 5000 psi
- 325°F
- 100' and 200' fixed base
- 100' and 200' 360 degree rotating base
- High pressure double seal swivels.
- Reels equipped for 3/8" hose. Easily convertible to 1/2" hose with the change to a 1/2" swivel.
- 2 year warranty

## Nozzle Size Selection Chart

Determine the nozzle size by the pressure washer's GPM @ PSI (gallons per minute @ a specific pounds per square inch). If the nozzle size is too small, your equipment can be damaged. If the nozzle size is too large, cleaning ability is compromised. Nozzle fan degree does not effect nozzle size selection.

## Nozzle Fan Selection

Select the nozzle degree, or spray angle, based on your application. Standard nozzle degrees – 0°, 15°, 25°, and 40°. Using the wrong nozzle degree can damage the surface you are cleaning.

0° – Red:

**Cutting nozzle.** It delivers a concentrated stream that can gouge or cut. It can cut stubborn stains from concrete and other hard surfaces.

15° – Yellow:

**Chiseling nozzle.** Working at a 45° angle, this nozzle works like a scraper, stripping paint and grime from hard surfaces.

25° – Green:

**Flushing nozzle.** The most commonly used nozzle for cleaning dirt from siding, sidewalks and metal furniture as well as for wet sweeping leaves.

40° – White:

**Wash nozzle.** Its wide spray allows you to wash and rinse a large area fast. It is usually safe with most surfaces, including aluminum siding, windows and vehicles.

## Sewer / Tube Cleaning Nozzles

The reverse jets on the fixed and rotary nozzles pull the hose through the tube or sewer line and blast debris from line or tube walls.

- Backward ports drive the nozzle forward and flush debris
- Forward ports blast into pipe and breaks up clogs & debris
- Physically small for cornering ability
- 4200 PSI
- Corrosion resistant stainless steel construction
- Orifice size indicated on non-rotating styles
- Rotating style adds extra agitation and surface cleaning
