5 to 10 Gallon Drum Pak	#PREV5	\$ 50.00

SHIPPING INCLUDED

To determine which product is best suited for your operation see the inside front cover for the explanation of this chart.

DEEP CLEANING OF ROOFS WHEN YOU WANT TO KILL THE MILDEW ROOT BED

For most homeowners the beginning of spring brings with it a sense of growth and rebirth as the air turns warmer and the first flowers of the season begin to bloom. Outside the world takes on a renewed freshness as the ground sheds its winter coat. This is why spring has been an ideal time for doing a deep cleaning and more often than not it is the *exterior of the house* that is at the top of the list of projects. In the warmer climates the roof seems to always be the first priority.

Most homeowners will call a contractor to perform the roof cleaning service and when the job is sold bleach usually becomes the cleaning product of choice. Unfortunately, bleach is nothing more than a quick, temporary fix to the problem and will only dissolve surface mildew and the mildew will reappear in a few short months.

Along with medium pressure between 800-1200 PSI, Prevail is the answer to penetrating and destroying the mildew root bed.

USE THIS PRODUCT for removing and destroying the mildew root bed on roofs. Bleach Free!
