AR High Pressure Pumps are the state-of-the-art choice since 1958.

Annovi-Reverberi Pressure Pumps: Engineered In the Same Tradition as an Italian Sports Car

Some names are simply synonymous with excellence. In the world of high pressure pumps, that distinction goes to Italian manufacturer Annovi-Reverberi. For more than 50 years, AR has combined quality materials with precision engineering to become the number one supplier of triplex plunger pumps for power washer manufacturers.

But as the Italians like to say, talk is cheap. Look closer at exactly what sets AR pumps apart from the rest of the pack:

- **Doubly Durable Materials**

Pump manifolds are forged from high strength brass for long-term use and provide optimum water flow. The plungers are also made from a unique aluminum oxide blend of thick ceramic for extra long life and resilience.

- **Extended Pump Life**

Crankcases are die cast in aluminum with oversized cooling fins to extend pump life, especially during continuous operation. And premium bearings provide exceptional load support while maintaining lower crankcase operating temperatures.

- **Innovative Design**

Valves, seats and springs are stainless steel and feature meticulously designed cages for positive seating and longer valve life. The seals and V-packings are continuously lubricating for consistent performance. Plus, the oil seals are triple-lipped and spring loaded for greater toughness.

- **Engineering to the Extreme**

Piston guides are high strength stainless steel, while extra-large connecting rods are made with a special alloy. Replacement parts are machined to the same exacting standards and specifications as original pieces; thus, repaired pumps will perform just like the new.

Of course, exceptional people are the final ingredient needed to design, produce, market and distribute superior Annovi-Reverberi pumps. Here again we set ourselves apart in several important ways. First, high quality standards are exceeded for all pump materials throughout the manufacturing and testing process. Second, new technologies are constantly being explored and developed to achieve world-class products. And finally, AR pumps are distributed here by AR North America, a family-based operation that has built a large and loyal customer base in industrial, commercial and agricultural markets.

RMV / RMW - Economy Axial Radial Drive Pumps

FEATURING

MANIFOLD: Aluminum precision die cast special anticorrosion finish for pumps RMW2G24 & RMW2.2G20D, all other pumps are brass and forged brass.

BOLTS: Three 6mm cadmium plated steel

PLUNGERS: Hardened stainless steel.

CRANKCASE: Precision die cast, large coupling fins.

BEARINGS: Premium oversized ball and needle bearings.

VALVES, SEATS, AND SPRINGS: Plastic poppet under 2300 psi, stainless steel poppet over 2300 psi, seat and cage, stainless steel spring.

SEALS: Buna-N 2000 and 2400 psi single seal, 2500 psi to 3000 psi dual seals.

Oil Capacity = 2.2 oz

Maximum Fluid Temperature = 140° F

Inlet Thread = 3/4" GH

Discharge Thread = 22mm

(a) Pumps with EZ suffix features EZ start valves. (b) Pump with SX suffix port rotated 180° from standard (c) Pump with ST suffix features short tubes inlet and outlet. (d) With 609A-SAE Flange

SPECIAL NOTE: Use only AR64545 for the RM/XJ/SJ/BK Series pumps only: Do NOT change oil. Use oil only to add if low. This oil is a specially formulated synthetic with special additives for the demands of the RM, XJ, SJ and BK pump series. No other oil is factory approved for these pumps, and could result in pump failure.

*Available upon special request (non-stock item)

SJV / SJW / XJV - Super Duty Axial Radial Drive Pumps

FEATURING

MANIFOLD: High strength forged brass for long term use.

BOLTS: Three 10mm grade 8.8.

PISTONS: Ceramic coated stainless steel for longer pump life in harsh environments.

CRANKCASE: Precision die-cast, large cooling fins for maximum heat dissipation. Sight glass, fill and drain plugs.

BEARINGS: Angular contact ball bearing stabilizes the crankshaft and one thrust needle bearing absorbs the plunger load and assure long radial plate life. All of the thrust plates are made of heat treated hardened steel for extended life.

VALVES, SEATS, AND SPRINGS: Stainless steel with specially designed Ultra Form cages provide extra long life and positive seating.

SEALS AND V-PACKINGS: Continuously lubricating for extended life.

UNLOADER: Built in to optimize performance while reducing setup time. Integral trap pressure, fixed or adjustable chemical injector.

RSV - Triplex Plunger Pump

FEATURING

MANIFOLD: New high efficiency design concept. (Patented). Forged brass for strength and no porosity for long life and higher hydrostatic pressures.

BOLTS: Eight 6mm grade 8.8.

PLUNGERS: Ceramic coated stainless steel.

CRANKCASE: Precision die-cast, cooling fins and anodized for maximum heat dissipation.

BEARINGS: Oversized for maximum life and load disbursement, needle bearing on the drive side and ball on the non-drive side. Each bearing is held in position on the crankshaft and crankcase by snap rings. This assures positive alignment and centering of the connecting rods and crankshaft in relation to the crankcase, it also eliminates the crankshaft from floating.

VALVES, SEATS, AND SPRINGS: Stainless steel with specially designed Ultra Form™ cages to provide long life and positive seating.

SEALS AND V-PACKINGS: "V" style (D-1) Buna-N (cotton duct weave base) strong and tightens under load.

OIL SEALS: All are constructed of Buna-N rubber.

PLUNGER RODS: Stainless steel construction for strength (no plating to scrape off), o-ring plunger sealing system.

CONNECTING RODS: One piece special alloy aluminum and bronze based, oversized for maximum strength, load disbursement, and life. Heavy pin area construction, for added load strength.

XTV - Triplex Plunger Pumps

FEATURING

MANIFOLD: High strength forged brass for long term use.

BOLTS: Six 6mm grade 12.9.

PLUNGERS: A special thick solid ceramic for long life, strong durability and more resilience.

CRANKCASE: Precision die-cast, large cooling fins and anodized for maximum heat dissipation. Sight glass, fill and drain plugs.

BEARINGS: Oversized for maximum life and load disbursement, two ball bearings. Each bearing is held in position on the crankshaft and crankcase by snap rings. This assures positive alignment and centering of the connecting rods and crankshaft in relation to the crankcase, it also eliminates the crankshaft from floating.

VALVES, SEATS, AND SPRINGS: Stainless steel with specially designed Ultra Form material valve cages that are impervious to water absorption and provide long life and positive seating.

SEALS AND V-PACKINGS: Continuously lubricating for extended life.

PLUNGER RODS: High strength stainless steel.

CONNECTING RODS: One piece special alloy aluminum based and bronze (+1800 PSI) oversized for maximum strength, load disbursement, and long life. Heavy pin area construction, for added load strength.

RW - Triplex Plunger Pump

FEATURING

MANIFOLD: Forged Brass for strength and no porosity and long life. Higher hydrostatic pressures for safety and performance.

BOLTS: Eight 10mm grade 8.8.

PLUNGERS: Are a special aluminum oxide blend, solid ceramic for long life, strong durability and more resilient. Ultra thick with SST retaining bolt.

CRANKCASE: Precision die-cast, large cross head for strength, large cooling fins and anodized (for maximum heat dissipation).

BEARINGS: Oversized for maximum life and load disbursement.

VALVES, SEATS, AND SPRINGS: Stainless steel with specially designed Ultra Form cages to provide long life and positive seating.

SEALS AND PACKINGS: High pressure packings "V" style (D-1) and lowpressure seals "Special profile" style (W-2) Buna-N (cotton duct weave base) strong and tightens under load. Top support ring.

OIL SEALS: All are constructed of Buna-N rubber

PLUNGER RODS: Stainless steel construction for strength (no plating to scrape off), back-up and O-ring plunger sealing system.

CONNECTING RODS: Heavy 1-piece special alloy aluminum based, oversized for maximum strength, load disbursement, and life. Heavy pin area construction, for added load strength.

SHP - Triplex Plunger Pump

FEATURING

MANIFOLD: New high efficiency design concept. (Patented). Forged brass for strength and no porosity for long life and higher hydrostatic pressures.

BOLTS: Eight 10mm grade 8.8.

PLUNGERS: A special aluminum oxide blend, solid ceramic for long life, strong durability and more resilient. Ultra thick with SST retaining bolt.

CRANKCASE: Precision die-cast, large cross head for strength, large cooling fins and anodized for maximum heat dissipation.

BEARINGS: Oversized "SKF" taper for maximum life and load disbursement.

VALVES, SEATS, AND SPRINGS: Stainless steel with specially designed Ultra Form cages to provide long life and positive seating.

SEALS AND PACKINGS: "Special profile" style (W-1 & W-2) Buna-N (cotton duct weave base) strong and tightens under load. Top support ring.

OIL SEALS: All are constructed of Buna-N rubber.

PLUNGER RODS: Stainless steel construction for strength (no plating to scrape off), bolt type retainer with a special plunger sealing system.

CONNECTING RODS: Heavy 2-piece special allow aluminum based, oversized for maximum strength, load disbursement, and life. Heavy pin area construction, for added load strength.

RTP / RTF / RTJ - Triplex Plunger Pumps

FEATURING

MANIFOLD: Forged Brass strength and no porosity for long life. Higher hydrostatic pressures for safety and performance.

BOLTS: Eight bolts, 12mm, grade 8.8

PLUNGERS: Special aluminum oxide blend, solid ceramic for long life, strong durability and more resilient tungsten coated stainless steel.

CRANKCASE: Precision die-cast, large cross head for strength, large cooling fins.

BEARINGS: Oversized for maximum life and load disbursement.

VALVES, SEATS, AND SPRINGS: Ultra form cages, durable, strength and long life. 303 and 400 series stainless steel. Machined valve caps..

SEALS AND V-PACKINGS: "V" style chevron style seal with a rear support seal. W-2 style low pressure seal with a support rod ting, Buna-N for a good positive seat.

OIL SEALS: Are constructed of Buna-N rubber. O-rings have stainless steel garder springs to assure constant tension on the sealing surface.

PLUNGER RODS: Stainless steel construction for strength.

CONNECTING RODS: Heavy two piece bronze, oversized for maximum strength, load disbursement and life. Heavy pin area construction for added load strength.

Accessories

CRANKCASE OIL / PUMP SAVER

AR Pump Oil is specially formulated Crankcase Oil for High Pressure Pumps. Contains anti-wear, rust inhibitor and deoxidizer additives.

- (a) AR64545 Crankcase Oil
AR Pump Models
XJV, SJV, XJW, SJW & BKV
4.5 oz
- AR64545C Crankcase Oil
AR Pump Models
XJV, SJV, SJW, SJW & BKV
4.5 oz - Case - 24 per package
- (b) AR64516 Crankcase Oil
Triplex Plunger Pump
16 oz
- AR64516C Crankcase Oil
Triplex Plunger Pump
16 oz - Case - 12 per package
- (c) AR64510 Pump Saver
Anti-Freeze Solution

TOOLS

Tools are designed for adjusting the Minimatic and Gymatic unloaders, and rear piston guide extracting tool for the XW series pumps.

- (c) AR1560590 Nut holder
Adjusting Gymatic Unloader
- (d) AR1540740 Nut holder
Adjusting Minimatic Unloader
- (e) AR980069 Rear Piston Guide Extractor
XW Series pumps
Thread Size: 30mm Ø x 1.00mm Pitch

GEAR BOXES - RK, XM & XW SERIES

Gear boxes designed to safely connect pumps and power supplies that operate at different speeds. Gear boxes fit into 1" and 1-1/8" shafts. They feature an SAE J609A flange for proper connection.

- (j) AR1689 RK / XM SERIES
1:2.24 Reduction box for 1" shaft,
SAE J609a flange (1450 RPM Pump)
- (j) AR1690 RKA / XMA SERIES
1:2 Reduction box for 1" shaft,
SAE J609a flange (1750 RPM Pump)
- (j) AR1697 XWA SERIES
1:2 Reduction box for 1" shaft,
SAE J609a flange (1750 RPM Pump)
- (j) AR1698 XW SERIES
1:2.24 Reduction box for 1" shaft,
SAE J609a flange (1450 RPM Pump)
- (j) AR1670 XW SERIES
1:2 Reduction box for 1 1/8" shaft,
SAE J609a flange (1750 RPM Pump)
- (k) AR1600 RK / XR / XW / SXW SERIES
1:2.24 Reduction box for 1" shaft,
SAE J609a flange (1450 RPM Pump)
- (k) AR1601 RK / XR / XW / SXW SERIES
1:2.24 Reduction box for 1 1/8" shaft,
SAE J609a flange (1450 RPM Pump)
- (l) AR1696 RK SERIES
2,65:1 Overgear for tractor P.T.O.

INLET KING NIPPLES (FOR GRAVITY FEED SYSTEMS)

Cadmium plated steel hose barb fitting for high pressure endurance. Hex base allows for standard wrenches to be used during installation. The hex base is large enough to allow accessory ports to be added. Compact design tapered bore for smooth water deliver. Barbs are long enough to allow two clamps to be used if necessary. King nipples assemble directly to the pump no adaptors needed. Barbs are designed to prevent hose slippage and fluid leaks.

- (f) FT783114 1/2" M NPT x 1-1/4" Hose Barb
- (g) FT783112 3/4" M NPT x 1-1/2" Hose Barb

RAIL KITS

Rail kits designed for the N Version pumps. Heights are available from 5/8" up to 2-5/8". Also a universal fitting rail kit is available at 1-1/2" fits most pumps.

	HEIGHT SIZE	PUMP SERIES
(h) AR2729	5/8"	SXM, XM, XM-SS
(h) AR1837	5/8"	RKW, RK, RK-SS
(h) AR2748	1-1/4"	SXW, XW
(h) AR1836	3/8"	XT
(h) AR1836H	1-1/2"	XT
(h) AR2633	1-3/4"	RKW, RK, RK-SS, XM, XM-SS
(h) AR2633H	2-5/8"	RKW, RK, RK-SS, XM, XM-SS
(i) U-Bracket	1-1/2"	Universal Bracket RK, XW, SXW
(cw) U-Bracket/CW		Retrofit for CAT310 & 5CP Series Pumps Same bolt mounting pattern..... \$48.51

FLANGES/COUPLINGS - RK, XM & XW SERIES

Flanges and Coupling Sets are designed for safely connect 24mm solid shafted pumps to electric motors which turn at the same speed. Coupling kits are available for connecting either 1-1/8" or 1-3/8" electric motor shafts to the pump. The mounting flange is used to mechanically connect the pump and motor to reduce vibrations, and keep them in proper alignment.

(m+n) AR1588	F14 - NEMA 182-184 bell housing and flexible coupling set (24mm x 1-1/8")
(m+r) AR1588-LJ	F14 - NEMA 182-184 bell housing and coupling set (LJ- 1-1/8" x 24mm)
(m+n) AR1589	F15 - NEMA 213-215 bell housing and flexible coupling set (24mm x 1-3/8")
(m+r) AR1589-LJ	F15 - NEMA 213-215 bell housing and coupling set (LJ- 1-3/8" x24mm)
(m) AR1380490	Bell housing for F14 & F15
(m) AR1380490-L	Bell housing for XW, SXW Series
(n) AR1380301	Coupling kit, pump side for F14 & F15 (24mm) includes couplings, bushings, and set screws.
(n) AR1380331	Coupling kit, motor side for F14 (1-1/8") includes couplings, bushings, and set screws.
(n) AR1380351	Coupling kit, motor side for F15 (1-3/8") includes couplings, bushings, and set screws.
(o) LJ10024M	24mm coupler
(p) LJ100138	1-3/8" coupler
(p) LJ100118	1-1/8" coupler
(q) LJ100SOX	Coupler insert
(r) LJ-L10011824	Complete 1-1/8" x 24mm set
(r) LJ-L10013824	Complete 1-3/8" x 24mm set

ELECTRIC CLUTCH - XM, RK & XW SERIES

The Electric Clutch enables operation of the drive system for your pump without the pump itself being engaged. There can be significant reduction in wear and tear on the pump since it is only operating when called for.

- CL-517162 12 Volt Double groove clutch
3/4" x 7" (for "A" section belts)
- CL-521491 12 Volt Single groove clutch
24mm x 7" (for "A" section belts)
- CL-522850 12 Volt Double groove clutch
24mm x 7" (for "A" section belts)
- AR-CLMP Clutch mounting plate

Accessories

THERMAL RELIEF VALVE

TPP140

The TPP140 Thermal Relief Valve Series are mounted into the low pressure side of the pump manifold, and will vent when water temperatures exceed the valve's specifications. This protects the pump from heat abuse.

(a)

Max PSI: 200
Max Temp: 140° F

(b)

(a) TPP140 Inlet 1/2" M

(b) TPP140 3/8" Inlet 3/8" M

(c) TPP140 1/4" Inlet 1/4" M

(c) Black cap included with all TPP140 units

MV610

Max PSI: 145
Max GPM: 8
Outlet: 7.5mm
Max Temp: 133° F

ML610-12 Safety Valve - 1/2" M Inlet
ML610-38 Safety Valve - 3/8" M Inlet
ML610-14 Safety Valve - 1/4" M Inlet

JETTER VALVE

Jetter valves are used to convert standard triplex plunger pumps into a sewer cleaning pump. The disabler pulse valves have adjustable levers enabling the pump to be changed to either configuration, by turning the handle on the valve. When engaged the valve stops the center valve from operating. This causes the pump to pulsate generating the jetting action needed for pipe cleaning.

(d) AR40235 XT, XM: pump disabler 3,000 PSI
(e) AR40161 RK: pump disabler 4,000 PSI
(f) AR40236 XW: pump disabler 4,000 PSI

HIGH PRESSURE BALL VALVES

BALL VALVES

Material: Body, Ball, Adaptor and Stem - Steel AISI - 12L14
Material: Ball Seal - Polyoxymethylene
Material: O-Ring - Nitril Buna Rubber
Temp: 140° F to 194° F
Features: Perfect spherically shaped and ground balls
Anti blow-out stem
Zinc plated body

	Max PSI	Inlet / Outlet	Body Length	Body Width	Body/ Stem Height	Handle Length*

*Handle length center to end.

EASY START VALVE

The Easy Start Valve eases internal pump pressures that can make cold starts with gasoline engines difficult. This helps to protect the pump from damage.

Max PSI: 5,000
Max GPM: 5
Max Temp: 300° F
Inlet: 3/8" M
Outlet: 1/4" Hose Barb
Shut off PSI: 120
Reopens PSI: 100

AR4000-2 Easy start valve

SAFETY RELEASE VALVE

Safety release valve eases internal pump pressure that can make cold start with gasoline engine difficult. This helps to protect the pump from damage.

Max PSI: 1,000 - 4,000
Max GPM: 6
Max Temp: 200° F
Inlet: 3/8" M

AR5000-1 Safety release valve

SECURITY VALVE - HIGH PRESSURE

Max PSI: 8,700
Max GPM: 21
Inlet: 1/2" F
By-Pass: 1/2" F
Max Temp: 195° F

AR40398 VRP 600

THREADED VALVE CAP

Threaded valve caps are used for connection of pressure gauges directly to the pump head to monitor pressure levels the pump is developing.

Inlet: 1/2" F
By-Pass: 3/8" F
Max Temp: 195° F

AR40399 VS500

Accessories

BOLT ON REGULATING VALVES/CONTROL SETS

Unloader features a bolt on design with internal by-pass system. Adjustable pressure releases pressure in pump head when in by-pass, protecting from over pressurization. Eliminates by-pass hose and fittings. Built-in chemical injector available. The molded plastic adjusting knob is designed for user comfort. Brass body with a stainless steel, plunger and spring, by-pass is aluminum or brass.

PRESSURE SWITCHES - BRASS

The Pressure Switches are designed for balancing pressure washers hot water systems. As the user demands hot water the pressure switch activates to allow water to flow through the heating coil. When demand ceases, the pressure switch closes the circuit to send water through the bypass circuit.

DUAL LANCES

Dual Lance Extensions allow easy switching between high pressure cleaning and low pressure chemical application. Stainless Steel pipes give increased life when applying variable pH products. Zinc pipes work well for normal cleaning applications with non-corrosive products. 40" Dual Lance Extensions give the added benefit of easy and comfortable control with the build in molded grip, plastic cover on the valve and enlarged nozzle protector maximize operator safety and comfort.

 AL650301 Repair Kit

LANCES / EXTENSIONS

Lance Extensions allow easy switching between high pressure cleaning and low pressure chemical application. Stainless Steel pipes with molded grip provide durable performance using chemical products that would attack a plated lance. Zinc pipes work well for normal cleaning applications with non-corrosive products. Available with Vented Grips to allow comfortable usage of a lance assembly where hot water would normally prevent it. User's hands won't contact the heated lance.

TELESCOPING LANCES

Telescoping lance, it can extend to a full length of 18' and 24'. The lance is rated for a maximum pressure of 4000 PSI and a flow of 7GPM, with the water being carried through a single steel-braided 1/4" hose.

Max PSI: 4,000
 Max GPM: 7
 Inlet: 3/8" F (Pipe Thread)
 Outlet: 1/4" F (Quick Connect)
 Hose: 1/4"
 Max Temp: 300° F
 Features: Length is in three sections

ARTEL-18 6' - 18' Lance
 ARTEL-24 10' - 24' Lance
 ARTEL-18A 6' - 18' Aluminum Lance
 ARTEL-24A 10' - 24' Aluminum Lance

AR North America telescoping lance belt designed to aid in the handling of the long lance. Made of Nylon it adjust from a minimum of 33" waist to a maximum of 58" waist.

ARTEL-BELT 33" to 58" Waist

The Zero G telescoping lance attachment gives you complete control of 18' and 24' telescoping lances. This one of a kind product enables complete control easy lift and protection from lift breakage.

ARTEL-ZG Zero G Control Kit

NOZZLE HOLDERS

The Nozzle Holders offer a simple method for controlling pressure in the system. Available as an adjustable hollow nozzle holder, or as a change over nozzle, These fittings reduce the work needed during typical cleaning operations.

Accessories

TURBO NOZZLES

The AL-TPR Turbo Nozzle series delivers maximum cleaning power to your situation. The internally rotating nozzle conveys the water power of a zero degree nozzle, but spins it in a circle to clean a much larger area. For best results, match pump output specifications to those of the turbo nozzle

AL-TTR14

ARO-SNUB 1/4" Gauge Dampener

SANDBLAST KITS

Instructions: Run the sand suction hose on top of the lance. If sand suction hose is under the lance during operation water can run down the sand suction hose getting the sand wet and it will not flow through the head. Eventually the hose will plug and the assembly will need to be cleaned and dried before using. Several pieces of electrical tape can be used to hold the hose in place. (Figure 1) Silica sand is recommended.

HOSE REEL

This heavy gauge steel construction hose reel, bolt on design, maximum pressure 3000 PSI, handles 100 feet of 3/8" pressure hose. Designed for use on portable, trailer or truck mount and pressure washers. Can also be mounted for drop lines.

Max PSI: 3,000
 Inlet: 3/8"
 Max Temp: 160° F
 Holds Hose Length: 100' of 3/8" Pressure Hose

AR-REEL100 Hose Reel

SURFACE CLEANERS

Easy and quick to use. Used with either hot or cold-water pressure washers with pressures from 3000 to 4000 PSI and temperatures up to 180° F. Walk behind. Durable. Removes tree sap, dirt and other non permanent materials that you want to remove from hard surfaces. the rotary cleaner blasts away dirt, grease and grime in all sorts of tough cleaning areas...pools, decks, sidewalks, warehouse floors, restaurants, retail/shopping centers, garages, etc

CLEANING HEADS

BISW060 / BISW120

Self spinning washing heads for containers open on one side. Reduce water consumption by not washing an area of 120° wide at the base of the spray head keeping spray in the container. With a spinning speed of 120 g/min. Aqua Motor.

Max PSI: 2,900
Inlet: 1/2" F
Max Temp: 194° F

	Max GPM	Min. Pass Thru Hole
BISW060	3.9 - 15.8	3.93"
BISW120OB	7.9 - 31.7	6.29"

BIRW086 / BIRW200

Self spinning washing head completely made of stainless steel without any kind of lubricant oils or greases. Application recommended for big containers in food processing, beverage, chemical, pharmaceutical industries and truck and rail tankers. Aqua Motor.

Max PSI: 75 - 2,900
Min. Pass Thru Hole: 5.29" F
Max Temp: 194° F

	Max GPM	Inlet
BIRW086	2.1 - 15.8	1/2" F
BIRW200	15.8 - 52.8	1" F

BIFV020 / BIFV025

Self spinning head for washing medium-large containers (tank trucks, urban refuse containers, silos). With a spinning speed of 2-12 g/min for the FV020 and 10-30 g/min for the FV025. Aqua Motor.

Inlet: 1/2"
Min. Pass Thru Hole: 6.69" F
Max Temp: 194° F

	Max PSI	Max GPM
BIFV020-50	725	2 - 12
BIFV020-200	2,900	2 - 12

BIFV025-50	2,900	10 - 30
BIFV025-200	2,900	10 - 30
BIFV025-400	5,800	10 - 30

BIRW220 / BIRW240

Self spinning head for washing medium-large containers (tank trucks, urban refuse containers, silos). Aqua Motor.

Max PSI: 72 - 435
Max GPM: 15.8 - 52.8
Inlet: 1" F
Max Temp: 194° F

	Min. Pass Thru Hole
BIRW220	11.02"
BIRW240	13.78"

BIPW060 / BIPW063

Self rotating cleaning head working at a set, constant rotating speed. Ideal for "Car Wash", portal and underbody washing systems. With a spinning speed of 65-125 g/min for the PW060LC and 100-140 for the PW063LC. Aqua Motor.

Max PSI: 435 - 2,900
Max GPM: 29 - 435

	Max PSI	Max GPM
BIPW060LC	435 - 2,900	3.9 - 15.8
BIPW063LC	29 - 435	7.9 - 15.8

BIXB030

Round shaped washing heads (without protrusions) for medium-small containers. Especially suited for fitting to automatic systems. E=Electric Motor - P=Air Motor - A=Aqua Motor.

Max PSI: 2,900
Max GPM: 7.9
Min. Pass Thru Hole: 1.96"
Inlet: 1/2"
Max Temp: 194° F

BIXB030E Electric Motor
BIXB030P Air Motor
BIXB030A Aqua Motor

BIXB060

Round shaped washing heads (without protrusions) for medium-small containers. Especially suited for fitting to automatic systems. E=Electric Motor - P=Air Motor - A=Aqua Motor.

Max PSI: 2,900
Max GPM: 15.8
Min. Pass Thru Hole: 1.96"
Inlet: 1/2"
Max Temp: 194° F

BIXB060E Electric Motor
BIXB060P Air Motor
BIXB060A Aqua Motor

BIRC030

Washing head for medium-small containers with minimum 57 mm diameter pass-through hole. E=Electric Motor - P=Air Motor.

Max PSI: 2,900
Max GPM: 7.9
Min. Pass Thru Hole: 2.24"
Inlet: 1/2"
Max Temp: 194° F

BIRC030E Electric Motor
BIRC030P Air Motor

BIXC060

Washing head for medium-large containers with minimum 57 mm diameter pass-through hole. E=Electric Motor - P=Air Motor - A=Aqua Motor.

Max GPM: 15.8
Min. Pass Thru Hole: 2.24"
Inlet: 1/2"
Max Temp: 194° F

BIROTY018

Washing head for small containers with minimum 40 mm diameter pass-through hole.

Max PSI: 2,176
Max GPM: 4.7
Min. Pass Thru Hole: 1.57"
Inlet: 3/8" F
Max Temp: 194° F

BIROTY018 Washing Head

ROTOSH CLEANING HEADS

ROTOSH/F - FLEX

Tank Cleaning Electric Rotating Head Cleans and Drains.

Recommended Pressure:	1,160 PSI
Max PSI:	2,030
Max GPM:	6.6
Max Temp:	176° F
Inlet:	3/8" G M
Outlet:	Ø 17mm
Electric Motor:	12 V. cc.
Power Supply:	12 V. cc.
Nozzle Rod Rotating Speed:	52 RPM
Weight:	10.30 lbs
Features:	Electric motor-reductor Water outlet Washing-suction or suction only valve Water inlet Positioner Orbitating head with protection Flexible suction pipe Cable - 10 mt long w/waterproof connections Extension for larger capacity barrel Nozzles Bi-adhesive velcro type for power supply fixing Power supply

ROTOSH/F Cleaning Head

ROTOSH/R - RIGID

Tank Cleaning Electric Rotating Head Cleans and Drains.

Recommended Pressure:	1,160 PSI
Max PSI:	2,030
Max GPM:	6.6
Max Temp:	176° F
Inlet:	3/8" G M
Outlet:	Ø 17mm
Electric Motor:	12 V. cc.
Power Supply:	12 V. cc.
Nozzle Rod Rotating Speed:	52 RPM
Weight:	10.30 lbs
Features:	Electric motor-reductor Water outlet Washing-suction or suction only valve Water inlet Positioner Orbitating head with protection Flexible suction pipe Cable - 10 mt long w/waterproof connections Extension for larger capacity barrel Nozzles Bi-adhesive velcro type for power supply fixing Power supply

ROTOSH/R Cleaning Head

ROTOSH-SMART

Barrique Cleaning Elector Rotating Washing.

Recommended Pressure:	1,160 PSI
Max PSI:	2,030
Max GPM:	6.6
Max Temp:	176° F
Inlet:	3/8" G M
Outlet:	Ø 30mm
Electric Motor:	12 V. cc.
Power Supply:	12 V. cc.
Nozzle Rod Rotating Speed:	52 RPM
Weight:	61.64 lbs
Features:	Stainless Steel Frame Detachable handle Nylon wheels To be used for 225-300 l barriques Electric panel Connections to Pressure Washer Exhaust water conveyer

ROTOSH-SMART Cleaning Head

AR620 / AR630

KB 2G15 is a powerful high pressure electric cleaner It comes with trigger gun for positive shut off and user safety, pressure adjustment –to tailor pressure to the application, pressure gauge, automatic safety valve with low pressure by-pass, built in detergent suction, tank, easy clean mesh designed water filter - to protect the pump, twist fast coupler for quick removal and attachment of pressure hose. A safety lock prevents the trigger from accidentally engaging when not in use. Equipped with GFCI to shut down power supply in the event of electrical ground failure.

Max PSI:	1,900
Max GPM:	2.1
Horse Power:	2
Amps:	19
Weight:	57 lbs.

Equipped With:

- Triplex pump with ceramic plunger
- Connecting rod system
- Pressure adjustment
- Built-in detergent suction
- Pressure gauge
- Motor thermal protector
- High Pressure 20' hose
- Gun and lance
- Vari-spray nozzle head
- Garden Hose Adapter, filter
- 35' GFCI Cord

AR Blue Clean Electric Pressure Washers

BLUE CLEAN ELECTRIC PRESSURE WASHERS

AR112

Cold water pressure cleaner is fitted with Triplex pump with axial pistons controlled by wobble plate, Total Stop System for automatic start/stop - Water filter - quick connect garden hose - Universal electric motor - Adjustable spray head with pencil and fan jet settings - Detergent injector Kit.

Max PSI: 1,600
 Max GPM: 1.58
 Horse Power: 1.1
 Motor: 120V 60Hz / 11 amps
 Weight: 14.5 lbs.

Equipped With:

- Gun
- Lance with adjustable jet nozzle
- 20' high pressure hose
- Foam dispenser
- Total Stop System

Standard Equipment

AR112 Pressure Washer

AR141

Cold water pressure cleaner is fitted with Triplex pump with axial pistons controlled by wobble plate, Total Stop System for automatic start/stop - Water filter - quick connect garden hose - Universal electric motor - Adjustable spray head with pencil and fan jet settings - Detergent injector Kit.

Max PSI: 1,750
 Max GPM: 1.63
 Horse Power: 1.2
 Motor: 120V 60Hz / 12 amps
 Weight: 17 lbs.

Equipped With:

- Gun
- Lance with adjustable jet nozzle
- 20' high pressure hose
- Foam dispenser
- Total Stop System

Standard Equipment

AR141 Pressure Washer

AR118

Cold water pressure cleaner is fitted with Triplex pump with axial pistons controlled by wobble plate, Total Stop System for automatic start/stop - Water filter - quick connect garden hose - Universal electric motor - Adjustable spray head with pencil and fan jet settings - Detergent injector Kit.

Max PSI: 1,500
 Max GPM: 1.58
 Horse Power: 1.1
 Motor: 120V 60Hz / 11 amps
 Weight: 14.5 lbs.

Equipped With:

- Gun
- Lance with adjustable jet nozzle
- 20' high pressure hose
- Foam dispenser
- Total Stop System

Standard Equipment

AR118 Pressure Washer

AR240

Cold water pressure cleaner is fitted with Triplex pump with axial pistons controlled by wobble plate, Total Stop System for automatic start/stop - Water filter - quick connect garden hose - Universal electric motor - Adjustable spray head with pencil and fan jet settings - Detergent injector Kit.

Max PSI: 1,750
 Max GPM: 1.58
 Horse Power: 1.3
 Motor: 120V 60Hz / 12.5 amps
 Weight: 19 lbs.

Equipped With:

- Gun
- Lance with adjustable jet nozzle
- 18' high pressure hose
- Foam dispenser
- Turbo lance
- Fix brush
- Total Stop System

Standard Equipment

AR240 Pressure Washer

AR Blue Clean Electric Pressure Washers

AR383

Cold water pressure cleaner is fitted with Triplex pump with axial pistons controlled by wobble plate, Total Stop System for automatic start/stop - Water filter – quick connect garden hose – Universal electric motor - Adjustable spray head with pencil and fan jet settings - Detergent injector Kit.

Max PSI: 1,900
 Max GPM: 1.51
 Horse Power: 1.5
 Motor: 120V 60Hz / 14 amps
 Weight: 22 lbs.

Equipped With:

- Gun
- Lance with adjustable jet nozzle
- 20' high pressure hose
- Foam dispenser
- Static hose reel
- Rotary brush
- Turbo nozzle/lance
- Total Stop System

Standard Equipment

AR383 Pressure Washer

AR610

Split lance for fast sudsing and power cleaning, pressure adjustment, built in detergent suction, pressure gauge are all features. Automatic safety valve with low pressure by-pass and a detergent injector kit with low pressure soap. Thermal switch shuts off when temperature rises too high. It is designed to be compact and very portable. Detergent tank and handle allow for easy movement between jobs. A safety lock prevents the trigger from accidentally engaging when not in use. Equipped with GFCI to shut down power supply in the event of electrical ground failure.

Max PSI: 1,800
 Max GPM: 2.1
 Horse Power: 1.7
 Motor: 120V 60Hz / 15 amps
 Weight: 48 lbs.

Equipped With:

- Triplex pump with ceramic plunger
- Connecting rod system
- Pressure adjustment
- Built-in detergent suction
- Pressure gauge
- Motor thermal protector
- Detergent tank 7 oz
- High Pressure 25' hose, gun and lance
- High/Low pressure adjustable spray head
- Garden Hose Adapter, filter
- 35' GFCI Cord
- Total Stop System

Standard Equipment

AR610 Pressure Washer

AR620 / AR630

KB 2G15 is a powerful high pressure cleaner It comes with trigger gun for positive shut off and user safety, pressure adjustment –to tailor pressure to the application, pressure gauge, automatic safety valve with low pressure by-pass, built in detergent suction, tank, easy clean mesh designed water filter – to protect the pump, twist fast coupler for quick removal and attachment of pressure hose. A safety lock prevents the trigger from accidentally engaging when not in use. Equipped with GFCI to shut down power supply in the event of electrical ground failure.

Max PSI: 1,900
 Max GPM: 2.1
 Horse Power: 2
 Motor: 120V 60Hz / 19 amps
 Weight: 57 lbs.

Equipped With:

- Triplex pump with ceramic plunger
- Connecting rod system
- Pressure adjustment
- Built-in detergent suction
- Pressure gauge
- Motor thermal protector
- High Pressure 25' hose
- Gun and lance
- Vari-spray nozzle head
- Garden Hose Adapter, filter
- 35' GFCI Cord
- Total Stop System

Standard Equipment

AR620 Pressure Washer
 AR630 Pressure Washer - Brass Head
 AR630-Hot 180° F Inlet Temp

AR767

AR767 is all you are looking for a high quality professional pressure washer. The sharp ergonomic design –new trolley, built in detergent suction, built in detergent tank- guarantees unrestricted mobility and no effort. The pressure adjustment tailors the pressure to the application. Optional Hose Reel. A safety lock prevents the trigger from accidentally engaging when not in use. Equipped with GFCI to shut down power supply in the event of electrical ground failure.

Max PSI: 1,900
 Max GPM: 2.1
 Horse Power: 2
 Power: 115V 60Hz / 19 amps
 Weight: 75 lbs.

Equipped With:

- Two wheel trolley
- Pressure adjustment
- Pressure gauge
- High/Low pressure adjustable
- Spray wand
- Gun/Wand assembly
- Built in detergent suction
- Built in detergent tank
- High Pressure hose 25'
- Automatic safety valve with low pressure by-pass
- Induction motor
- Motor thermal protector
- Total Stop System

Standard Equipment

AR767 Pressure Washer
 AR40340 Hose Reel with 25' Rubber Hose

NOZZLE

* AT 12" (30 CM) DISTANCE FROM THE THEORETICAL IMPACT OF SPRAYING WATER
Impact Force (lbs.) = .0526 x GPM x √ PSI

$$\text{Nozzle \#} = \text{GPM} \times \sqrt{\frac{4000}{\text{PSI}}}$$

$$\text{GPM} = \text{Nozzle \#} \times \sqrt{\frac{\text{PSI}}{4000}}$$

$$\text{PSI} = (\text{Nozzle \#}/\text{GPM})^2 \times 4000$$

HOW TO READ AR NORTH AMERICA PUMP NUMBERS

Pump Series (3) / **Production Week** (2) / **Year** (2) / **Progressive No.** (4) / **Manufacturing Code** (5)

Pump Series (3) / **Production Week** (2) / **Year** (2) / **Progressive No.** (4)

SUFFIX MEANINGS

SERIES OF PUMPS	RPM RATINGS	SHAFT SIZES	UNLOADER CODES
XP XT XB XM SJ RK XJ XW BK SX	A = 1750 RPM V = 3400 RPM RK, SX, XW, XM, XR, XT = 1450 RPM XP, XB = 3400 RPM	N = Natural Shaft 24mm solid shaft E = Electric Shaft 5/8", 1-1/8" hollow shaft D = Direct Gas Drive Shaft 3/4", 1", 7/8" hollow shaft	M2 = Minimatic C2 = Gymatic VR = VR35

PUMP HEAD TYPES	FLANGE TYPES
Anodized Aluminum B = Forged Brass (XTA2G15EBA-F8) H = Nickel Plated (RK1528HN)	F7 = Flange for XTV, XJV Series "D" Version for Close Coupling to Gas Engine (3/4" I.D. Shaft). F8 = Flange for XTA, XTV, XJV Series "E" Version for Close Coupling to NEMA 56 - C Motors (5/8" I.D. Shaft). F14 = Bell Housing and Flexible Coupling Set for XRCA Series for NEMA 182-184 (1-1/8" I.D. Shaft). F15 = Bell Housing and Flexible Coupling Set for XRCA Series for NEMA 213-215 (1-3/8" I.D. Shaft). F17 = Flange for RKA, XRCA Series "E" Version for Close Coupling to NEMA 182-184. F23 = 5/8" Hollow Shaft Close Couple to XMV Pump. F24 = Flange for RKV, XRCV, XMV Series "D" Version for Gas Engine (1" I.D. Shaft). F25 = Flange for XMV Series "D" Version for Gas Engine (3/4" I.D. Shaft). F27 = Flange for XJW Series "D" Version for Vertical Gas Engine (7/8" I.D. Shaft). F33 = NEMA 56-C Flange for XM Series "E" Version (5/8" I.D. Shaft). F35 = Flange for GRKV Series "V" Version for Tapered Gas Engines (1" I.D. Shaft).

AR PUMP CARE

- To prevent freezing use Environmentally Friendly or R.V. Antifreeze. (Always use for winter storage.)
- Change oil every 3-5 months or every 500 hours of operation (initial break-in oil change after first fifty hours).
DO NOT change oil in the SJ & XJ Series Pumps.
- Flush water valves and detergent injectors with plain water on a regular basis after use.
- Use Line Strainer, 50 mesh minimum.
- Never store pump with water in it.
- Consult local service dealer or AR North America for chemical usage.

Warranty

LIMITED WARRANTY

Annovi Reverberi (A.R.) Cam Shaft Plunger Pumps are warranted for a period of five years and Axial Radial Pumps are warranted for a period of one year to the original purchaser. Electric Pressure Washers are warranted for a period of one year to the original purchaser. This is from the date shipped from factory or U.S. Warehouse. **AR, ArrowLine** and **GF** accessories are warranted for a period of 90 days.

Warranty covers manufacturing defects or workmanship; that may develop under normal use and service in a manner up to the directions and usage recommended by the manufacturer.

Warranty does not apply to misuse or when pump or accessory is altered or used in excess of recommended speeds, pressures, temperatures or handling fluids not suitable for pump or accessory material construction. Warranty does not apply to normal wear (*such as but not limited to: seals/packings, valves, plungers and sealing o-rings*), freight damage, freezing damage or damage caused by parts or accessories not supplied by AR North America, Inc.

Liability of manufacturer for warranty is limited to repair or replacement of parts only at the option of the manufacturer when such products are found to be of original defect or workmanship at the time it was shipped from factory. This warranty is in lieu of all other warranties, expressed or implied, including any warranty of merchantability and of any and all other obligations or liabilities on the part of the manufacturers or equipment.
