

Bond Breaker

The Ultimate in "Film Free" Cleaning!

EnviroSpec has gone berserk! A few years back we decided to make an attempt at combining all the chemistry that make each one of our non-caustic detergent formulations unique in their own way. A challenge that, at times, was overwhelming since surfactant stability generates excruciating headaches for any chemists.

The criteria for our project was as follows:

- 1) We wanted the product to be extremely high in horsepower yet Safe to use.
- 2) We wanted the product to dissolve the toughest grease and carbon on contact.
- 3) We wanted the product to produce the ultimate in Film Free Cleaning.
- 4) We wanted the product to have exceptional rinsing characteristics.
- 5) We wanted the product to produce a high degree of "gloss" when rinsed.

Bond Breaker has been on the market going into it's third year and it is evident that we do, indeed, have a winner. No, Bond Breaker is not for everyone. It is an extremely expensive product to formulate and stabilize. It is aimed at a unique market that demands the very best and expects it to perform accordingly.

Bond Breaker is a professional strength alkaline detergent that is highly recommended for truck washing. The pH booster powder included with this product helps to break the bond of road film on vehicle surfaces. Special rinsing agents make the detergent sheet off the surface to shorten rinsing time. It can also be useful for a variety of other cleaning applications.

So, if you are looking for the Ultimate in Film Free Cleaning and Degreasing
order up a 55 Gallon Drum Pack of **Bond Breaker**

PH: 12.4-12.6
