

ENVIROSPEC CLEANING CHEMICALS

CLEANING TRUCKS

Are you taking off the paint along with the dirt?

Your Solution: **Prodigy**

Did you know that many truck cleaning products are actually **corrosive**? Sure, they wash away the surface dirt, but since they work like paint strippers, they also wash away a microscopic layer of paint.

Eventually, the result of using these caustic chemicals is a **dull looking finish**, where there used to be a bright, shiny surface. The customer wonders why his equipment seems to be aging so quickly.

But contractors who try **Prodigy by EnviroSpec** see at first glance that its superior degreasing properties are simply better at removing tough road grime. And the sparkling high-gloss finish that's left makes the entire fleet look new.

Which is probably why the major carriers clean hundreds of thousands of their vehicles with **Prodigy**, making it the number 1 selling truck wash in the country. Find out more at EnviroSpec.com/Chem_Prodigy.htm

Looking for a high-foaming alternative? New **Black Jack** is perfect for hot climates where water evaporates quickly. It also rinses faster when using hot water.

So from now on, take off the dirt—and *only* the dirt.

"Great degreaser on tractor trailers. Great job for such a small investment."
— Randall Peyton

Thanks for contributing!

When you purchase any chemical detergents from EnviroSpec, the profits we make go to great causes such as **children's hospitals** and career opportunities for **veterans**.

Plus over the last 7 years, our chemical customers, through their purchases, have made it possible to spay and neuter over **3500** animals, find homes for over **2600** pets, and maintain a no-kill animal sanctuary for homeless dogs and cats.

SuperFlo Polymer™ detergents: Cleaners in a class by themselves.

What is SuperFlo Polymer? It's the 'black magic' behind all EnviroSpec's chemicals. It adds so much professional-quality cleaning power to our detergents, that the only time we lose a chemical customer...is when they retire.

All chemicals are shipped in powder form, in drum packs. You could add 1/4 pound of our product to a gallon of water, **and it will still outclean** a full pound of a competitive product in a gallon of water. This means less bulk and weight to carry around. *And* less chance of running out in the middle of a job. *And* an impressive high-shine surface, no matter what you're cleaning.

Did we mention that all EnviroSpec chemicals are also **environment-friendly**? That's important to us, and we hope it's important to you too.
