EXTERIOR HOUSE WASHING...

We recommend washing a house with the intention of removing pollutants, surface oxidation, as well as mold and mildew. By doing this type of washing you provide customers with an excellent result and make competitors that wash a house with what EnviroSpec calls the "splash and dash" method look like amateurs. "Splash and Dash" refers to the person that splashes bleach or chlorine on the house, rinses and leaves. There are various levels of clean, and various qualities of work.

Corporate Philanthropy

The bulk of the profits that we make from your purchases make lives better for unfortunate children and animals at a time when they need it most.

There are many great charities out there that need all the help they can get. Maybe one of our favorites will become one of yours.

The charities that we have selected are the Shriner's Hospital for Children in Tampa, FL, Paul Newman's Hole in the Wall Gang Camp in Ashford, CT & Suzie's Friends Animal Sanctuary in Homerville, GA.
