

Power Stroke

Specifically developed for
Flat Surface CONCRETE CLEANING

such as:

Driveways & Patios, Sidewalks & Garage Floors,
Dumpster Areas, Swimming Pools, Ramps & Runways

“Power Stroke” has successfully replaced the harsh caustics that have been being used for years. The science behind Power Stroke has made it one of the Professionals First Choices when it comes to the toughest of jobs.

Non-Caustic, Phosphate Free with
Contains - CONCRETE BRIGHTENING AGENTS

Power Stroke is, by far, the highest non-caustic detergent concentration available in the industry.

Although Power Stroke has been specifically formulated for heavy-duty concrete and oil/grease removal it has found itself in a large variety of applications as being the one product to have on hand when nothing else will work.

Power Stroke exhibits excellent wetting, rinsing and emulsification properties due to its high concentration of our SuperFlo Polymer Complex System. This exotic complex is formulated from a variety of unique dispersants, hydrotopes, and surfactants, which are not commonly found in detergent formulations.

The general rule of thumb in detergent formulation is as follows: Approximately 1 gallon of water will hold approximately 1 pound of powder before separation begins. If your product begins to separate using this calculation, more often than not, your product has been camouflaged with what is known in our industry as fillers. Fillers provide little to no value to the products integrity. They are used primarily to add weight and increase the bottom line profit for the manufacturer. A typical filler would be Soda Ash. Using the 1 pound per 1-gallon rule you can see the potency of Power Stroke when you consider that we are able to thoroughly dissolve up to 2.5 pounds of Power Stroke into 1 gallon of water without separation. To our knowledge - no other company can make this claim. The advantage of these concentration levels are two fold: 1) the contractor is now able to clean substrates that normally require the use of caustic cleaners and 2) work faster and safer which increases your bottom line.

PH: 12.5-12.7

Caustic: No

Degreaser: Yes

Phosphates: No

Color: Light Brown

Scent: Cinnamon

Rinsing: Very good

SuperFlo Polymer: Yes

Packaging: Two 40 lb cartons of powder with no liquid additives that will yeild 55 gallons of liquid detergent concentrate

55 Gallon Professional Kit

Weight 80 lbs.
