

The Rotomax is designed to improve the cleaning efficiency of your high pressure washer by producing a rotating action that greatly expands the contact area of the cleaning stream, while providing the impact of a zero-degree nozzle. The unique internal design allows aim-and-shoot operation, even when cleaning overhead, and permits easy replacement of all wear parts. Sized according to flow rate, a Rotomax is perfect for your toughest cleaning tasks.

IMPORTANT

When installing the Rotomax, please note:

Do not tighten the Rotomax by the plastic cover; use a wrench on the hex portion of the inlet nipple (#10 on parts drawing). This will avoid stripping the holding screw on the plastic cover.
